

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

Your directors present their report on the consolidated entity consisting of QBE Insurance Group and the entities it controlled at the end of or during the year ended 31 December 2008.

DIRECTORS

The following directors held office during the whole of the financial year and up to the date of this report:

EJ Cloney (chairman)
LF Bleasel AM
DM Boyle
IF Hudson
BJ Hutchinson AM
CLA Irby
IYL Lee
FM O'Halloran

At the 2009 annual general meeting ("AGM"), Mr Cloney, Ms Hudson, Ms Hutchinson AM and Ms Lee will retire by rotation and offer themselves for re-election.

Details of the directors and their qualifications are provided on pages 40 and 41.

CONSOLIDATED RESULTS

	2008 \$M	2007 \$M
Revenue		
Premium revenue	12,853	12,361
Other revenue	2,866	2,153
Net fair value gains on financial assets	–	354
Net fair value gains on investment properties	–	2
Realised gains on sale of controlled entities	–	2
Investment income – ABC financial assets pledged for funds at Lloyd's	222	94
	15,941	14,966
Expenses		
Outward reinsurance premium expense	1,766	2,151
Gross claims incurred	7,743	6,651
Other expenses	3,494	3,294
Net fair value losses on financial assets	33	–
Expenses – ABC securities for funds at Lloyd's	245	103
Finance costs	240	218
	2,420	2,549
Profit before income tax	2,420	2,549
Income tax expense	554	615
Profit after income tax	1,866	1,934
Net profit attributable to minority interest	7	9
Net profit after income tax attributable to members of the company	1,859	1,925

PROFIT

2008 has been one of the most difficult years for the insurance industry in a long time. The result was impacted by a major fall in equity markets, substantially lower interest rates, a large increase in the frequency of catastrophe claims and an increase in property, professional liability and credit-related large individual risk claims. Given the difficult insurance and investment conditions, we produced a solid financial result with a net profit after income tax of \$1,859 million, down 3% from \$1,925 million last year. The result was affected by a number of significant items including substantial unrealised losses on our equity portfolios, large foreign exchange gains, a large profit on the restructure of our debt, an increase in large individual risk claims and the effect of lower interest rates on investment income.

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

DIVIDENDS

The directors are pleased to announce a final dividend of 65.0 cents per share for the year ended 31 December 2008. The substantial growth in our overseas profits has meant that the franking of the final dividend will be at 20%. The total dividend for 2008 is 126.0 cents, up 3% compared with 122.0 cents for the year ended 31 December 2007. The final dividend payout is \$645 million, up 12% from \$576 million last year. The total dividend payout is \$1,187 million or 64% of net profit after income tax, up from \$1,068 million last year. The Dividend Reinvestment Plan has been reinstated. The franking account balance at 31 December 2008 on a tax paid basis was a surplus of \$223 million.

ACTIVITIES

The principal activities of the company and its controlled entities during the year were underwriting general insurance and reinsurance risks, management of Lloyd's syndicates and investment management.

SHAREHOLDERS' FUNDS

Shareholders' funds increased by 32% during the year to \$11,159 million at 31 December 2008. The number of shares advised to the Australian Securities Exchange increased from 886 million to 987 million mainly due to the issue of 98 million shares following subscriptions received under our institutional share purchase offer in December 2008. A further six million shares were issued on 20 January following subscriptions received under our Share Purchase Plan.

REVIEW OF OPERATIONS

Gross earned premium was \$12,853 million, up 4% from last year. Premium growth was mainly due to the US acquisitions made in 2007 and the acquisition of new distribution channels. We continued to achieve a high retention of customers; however, new business was less than target due to inadequate prices. Overall average premium rates declined although they were slightly better than expected at the beginning of 2008. The Group's cost of reinsurance reduced from 17% of gross earned premium to 14% due to generally lower reinsurance costs, synergies from the new acquisitions and the increased participation of our captive reinsurer, Equator Re.

The ratio of claims, commissions and expenses to net earned premium (combined operating ratio) was 88.5% compared with 85.9% last year. The net claims ratio was 57.6% compared with 54.3% last year. Our attritional claims ratio was in line with expectations and with last year, and was assisted by savings on central estimates booked to prior accident years. The ratio of large individual risk and catastrophe claims to net earned premium was considerably up at 10.2% compared with 6.6% last year. QBE experienced an increased frequency of claims from small to medium size weather-related catastrophes and large individual risk losses. The combined commission and expense ratio reduced from 31.6% to 30.9% reflecting the benefit of the underwriting agency acquisitions. The commission ratio reduced from 18.5% to 17.2% due to the elimination of commissions paid to agents acquired over the last two years. The expense ratio was 13.7%, up from 13.1% last year, mainly due to the expenses of the acquired agencies.

Australian operations

Australian operations' combined operating ratio was 90.6%, up from 82.9% last year. The result was impacted by an increased frequency of large individual risk and catastrophe claims combined with a slightly higher attritional claims ratio. Net earned premium of \$2,363 million was up 10% from last year. Small overall premium rate reductions were more than offset by continued high customer retention, the acquisition of QBE LMI, increased support from our intermediaries and the acquisition of three underwriting agencies. The claims ratio increased from 55.2% to 62.8%. The combined commission and expense ratio was 27.8% compared with 27.7% last year. The commission ratio reduced to 11.8% from 12.0% reflecting the benefits of acquiring the underwriting agencies. The expense ratio increased from 15.7% to 16.0% due to increased expenditure on strategic initiatives to improve bodily injury claims management and the interface with intermediaries, and the reduced performance fees from the Victoria and New South Wales workers' compensation managed funds.

Asia Pacific operations

Asia Pacific operations' combined operating ratio was 82.9% compared with 82.7% last year. The result reflects a continued low attritional claims ratio offset by an increase in large individual risk claims. Premium growth was supported by high customer retention, strong organic growth and the weaker Australian dollar. Net earned premium was up 8% to \$451 million. The claims ratio decreased slightly to 41.2% compared with 41.3% last year. The combined commission and expense ratio increased from 41.4% to 41.7%. A slightly higher commission ratio from the growth during the year was partly offset by reduced expenses following the implementation of new systems last year.

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

European operations

European operations' combined operating ratio was 85.6% compared with 84.8% last year, reflecting a continued low level of attritional claims and the profitable earn out of prior underwriting years, offset by an increase in large individual risk and catastrophe claims. Net earned premium reduced by 11% to \$3,252 million compared with \$3,653 million last year mainly due to the strengthening of the Australian dollar against sterling and increased reinsurance to Equator Re. The claims ratio increased from 51.8% to 54.2%. The combined commission and expense ratio was 31.4% compared with 33.0% last year. The improvement reflected the overriding commission on the increased business to Equator Re, an increase in business sourced through our own distribution channels and higher profit commissions from external names on syndicate 386.

the Americas

This division reported net earned premium growth of 21% to \$3,108 million, up from \$2,574 million last year. The growth included the impact of the acquisitions made in 2007, the North Pointe acquisition made in 2008 and the increased proportional reinsurance to Equator Re. Premium growth was less than expected due to the need to cancel some business which did not meet our profit requirements and new business being less than expected due to inadequate pricing. The combined operating ratio was 93.6%, unchanged from last year. The net claims ratio increased from 59.4% to 60.2% due to the increased frequency of catastrophe claims. The combined commission and expense ratio was 33.4% compared with 34.2% last year. The reduction was mainly due to the acquisitions made last year and the consolidation of the acquired underwriting agencies which reduced commissions and increased expenses.

Equator Re

Equator Re is QBE's wholly owned captive reinsurer based in Bermuda. This division reported net earned premium growth of 34% to \$1,913 million due to additional proportional reinsurance business mainly from the acquisitions made in the US during 2007. The combined operating ratio was 83.8% compared with 80.5% last year. The net claims ratio increased from 54.6% to 56.6% due to the increase in large individual risk and catastrophe claims, particularly Hurricane Ike, and prudent provisions raised against finance and credit-related policies exposed to the global financial crisis. The combined commission and expense ratio increased from 25.9% to 27.2%. This was entirely due to the increased proportional reinsurance business written and profit commissions paid to Group companies.

Investment income

Net investment income increased 4% to \$1,177 million from \$1,132 million last year. Investment income was impacted by net fair value losses on equities of \$554 million compared with fair value gains of \$100 million last year and lower interest rates. The result included foreign exchange gains of \$409 million and a profit of \$303 million on the repurchase of debt. The gross investment yield before borrowing costs, exchange gains and losses, investment expenses and the gain on repurchase of debt was 2.9% compared with 6.3% last year.

Income tax

Income tax expense for the period reduced from 24% of profit before tax last year to 23% primarily due to increased profits earned in lower tax countries.

Outstanding claims provision

The provision for outstanding claims for the majority of Group entities is determined after consultation with internal and external actuaries. The outstanding claims assessment takes into account the statistical analysis of past claims, allowance for claims incurred but not reported, recoveries and future interest and inflation factors. As in previous years, the directors consider that substantial risk margins are required in addition to actuarial central estimates to cover uncertainties such as latency claims, changes in interest rates and superimposed inflation. The APRA prudential standards for our Australian licensed insurers provide a capital credit for outstanding claims in excess of a probability of adequacy of 75%. The directors and management have set an internal target range of 85% to 94% using normalised risk-free discount rates. The directors have satisfied themselves that the Group's outstanding claims provision is within the internal target range.

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

GROUP INDEMNITIES

Article 115 of the company's constitution provides that the company indemnifies past and present directors, secretaries or other officers against any liability incurred by that person as a director, secretary or other officer of the company or its controlled entities. The indemnity does not apply to any liability (excluding legal costs):

- owed to the company or its controlled entities (e.g. breach of directors' duties);
- for a pecuniary penalty or compensation order under the *Corporations Act 2001*; or
- which did not arise out of conduct in good faith.

The indemnity extends to legal costs other than where:

- in civil proceedings, an exclusion above applies;
- in criminal proceedings, the person is found guilty;
- the person is liable for civil remedies in proceedings brought by the Australian Securities and Investment Commission ("ASIC"), a corresponding regulator in another jurisdiction or a liquidator (unless as part of the investigation before proceedings are commenced); or
- the court does not grant relief after an application under the *Corporations Act 2001* or corresponding legislation in another jurisdiction that the person acted honestly and having regard to all the circumstances ought fairly to be excused for negligence, default, breach of trust or breach of duty in civil proceedings.

Article 115 was revised at the 2006 AGM.

DIRECTORS' AND OFFICERS' INSURANCE

The consolidated entity pays a premium each year in respect of a contract insuring directors, secretaries, senior managers and employees of the consolidated entity together with any natural person who is either a trustee or a member of a policy committee for a superannuation plan established for the benefit of the consolidated entity's employees against liabilities past, present or future. The officers of the consolidated entity covered by the insurance contract include the directors listed on page 48, the secretary, DA Ramsay, and deputy secretary, P Smiles.

In accordance with normal commercial practice, disclosure of the total amount of premium payable under, and the nature of liabilities covered by, the insurance contract is prohibited by a confidentiality clause in the contract.

No such insurance cover has been provided for the benefit of any external auditor of the consolidated entity.

SIGNIFICANT CHANGES

There were no significant changes in the state of affairs of the consolidated entity during the financial year.

EVENTS SUBSEQUENT TO THE BALANCE DATE

No matter or circumstance has arisen since 31 December 2008 that has significantly affected, or may significantly affect:

- the consolidated entity's operations in future financial years;
- the results of those operations in future financial years; or
- the consolidated entity's state of affairs in future financial years.

LIKELY DEVELOPMENTS

Information on likely developments in the consolidated entity's operations in future financial years and the expected results of those operations has not been included in this report because disclosure of the information would be likely to result in unreasonable prejudice to the consolidated entity.

ENVIRONMENTAL REGULATION

The consolidated entity's operations are not subject to any significant environmental regulations under either Commonwealth or State legislation.

MEETINGS OF DIRECTORS

	FULL MEETINGS OF DIRECTORS ⁽¹⁾	MEETINGS OF COMMITTEES				
		AUDIT	CHAIRMAN'S	FUNDING	INVESTMENT	REMUNERATION
Number of meetings held	13	4	2	–	5	4
Number attended						
LF Bleasel AM	12	4	–	–	–	4
DM Boyle	13	4	–	–	–	4
EJ Cloney	13	–	2	–	5	4
IF Hudson	13	4	–	–	–	4
BJ Hutchinson AM	13	4	2	–	5	–
CLA Irby	12	–	–	–	5	–
IYL Lee	12	4	–	–	5	–
FM O'Halloran ⁽²⁾	13	–	2	–	5	–

(1) Included a five day review meeting in London, New York, Sun Prairie and Seattle. In addition, directors attended meetings for each of the Australian regulated insurance companies.

(2) Mr O'Halloran attends audit and remuneration committee meetings by invitation, not being a member of these committees.

During the February 2008 board meeting, the board also met as the nomination committee. Further meetings occurred during the year, including meetings of the chairman and chief executive officer, meetings of the directors with management or regulators and meetings of non-executive directors. From time to time, directors attend meetings of committees of which they are not currently members.

DIRECTORSHIPS OF LISTED COMPANIES HELD BY THE MEMBERS OF THE BOARD

From 1 January 2006 to 31 December 2008 the directors also served as directors of the following listed companies:

	POSITION	DATE APPOINTED	DATE CEASED
LF Bleasel AM			
APA Group	Chairman	30 October 2007	–
DM Boyle			
Stockland Trust Group	Director	7 August 2007	–
EJ Cloney			
Boral Limited	Director	3 March 1998	–
Patrick Corporation Limited	Director	1 May 2003	11 May 2006
BJ Hutchinson AM			
Coles Group Ltd	Director	23 September 2005	23 November 2007
Telstra Corporation Limited	Director	16 November 2001	7 November 2007
CLA Irby			
Aberdeen Asset Management plc	Chairman	1 August 1999	22 January 2009
Great Portland Estates plc	Director	1 April 2004	–
North Atlantic Smaller Companies Investment Trust plc	Director	10 December 2002	–
IYL Lee			
Mariner Financial Limited	Director	5 September 1985	30 October 2006
Keybridge Capital Limited (formerly Mariner Bridge Investments Limited)	Executive chairman	26 October 2006	–
Allco Finance Group Limited (formerly Record Investments Limited)	Director	16 January 2001	9 June 2006
Ten Network Holdings Limited	Director	13 October 2000	25 October 2007

Ms Hudson has no directorships relevant to this disclosure.

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

QUALIFICATIONS AND EXPERIENCE OF COMPANY SECRETARIES

DA Ramsay B Comm, LLB, LLM, FANZIIF, FCIS

Mr Ramsay is general counsel and company secretary of QBE Insurance Group Limited. His legal career commenced in March 1986 with Freehills, where he worked in the general commercial and litigation areas. In June 1993, he joined QBE as general counsel. Since May 2001, he has acted as general counsel and company secretary for the consolidated entity. He is also a director or secretary of a number of QBE controlled entities and acts as chairman of the policy committee and a trustee respectively of QBE sponsored superannuation plans in Australia and New Zealand.

P Smiles LLB, MBA, ACIS

Mr Smiles is the deputy company secretary of QBE Insurance Group Limited and company secretary of various QBE Australian subsidiaries. He has 17 years insurance experience, which includes 11 years as a corporate lawyer. Prior to commencing employment with QBE in 2002, Mr Smiles worked for the NRMA Insurance Group in various corporate roles. In addition to his current company secretarial duties, he also acts as a corporate lawyer advising QBE Group head office departments and Asia Pacific offices.

DIRECTORS' INTERESTS AND BENEFITS

(A) Ordinary share capital

Directors' relevant interests in the ordinary share capital of the company at the date of this report are as follows:

DIRECTOR	2008 NUMBER	2007 NUMBER
LF Bleasel AM	52,604	43,996
DM Boyle	5,247	5,003
EJ Cloney	635,621	635,377
IF Hudson	8,732	1,058
BJ Hutchinson AM	52,132	33,950
CLA Irby	15,000	15,000
IYL Lee	26,749	21,505
FM O'Halloran	1,067,991	1,056,826

(B) Options and conditional rights

At the date of this report, Mr O'Halloran had 338,740 (2007 264,483) options over ordinary shares of the company and 105,152 (2007 112,075) conditional rights to ordinary shares of the company under the Deferred Compensation Plan ("DCP"). Details of the DCP are provided in note 27 to the financial statements.

The names of all persons who currently hold options granted under the Employee Share and Option Plan ("the Plan") and conditional rights to ordinary shares of the company are entered in the registers kept by the company pursuant to section 168 of the *Corporations Act 2001* and the registers may be inspected free of charge.

(C) Loans to directors and executives

Information on loans to directors and executives, including amounts, interest rates and repayment terms are set out in note 28 to the financial statements.

(D) Related entity interests

Details of directors' and executives' interests with related entities are provided in note 28 to the financial statements.

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

REMUNERATION REPORT – AUDITED

The following information is included in the remuneration report:

- (A) Remuneration framework
- (B) Remuneration and reward structure
- (C) Employment agreements
- (D) Remuneration details
- (E) Share based compensation
- (F) At risk remuneration
- (G) Key management personnel – investment in QBE
- (H) Relationship between remuneration and company performance

The information provided in this remuneration report has been audited as required by section 308(3C) of the *Corporations Act 2001*.

The remuneration report outlines the policy of the board in relation to the remuneration of the directors and executives of the consolidated entity. In addition, this report details the remuneration of key management personnel of the consolidated entity who are defined as the directors (executive and non-executive) and those persons having authority and responsibility for planning, directing and controlling the activities of the consolidated entity, either directly or indirectly.

For the consolidated entity, key management personnel consist of the executive and non-executive directors who are listed on page 48 and other key management personnel who are listed in the table below. These key management personnel (as defined in AASB 124: Related Party Disclosures) include the five highest remunerated executives of the consolidated entity.

NAME	POSITION
SP Burns	Chief executive officer, European operations
NG Drabsch	Chief financial officer, QBE Insurance Group Limited
MJ Goodwin ⁽¹⁾	Chief executive officer, Asia Pacific operations
MD ten Hove	Group general manager – investments, QBE Insurance Group Limited
TW Ibbotson ⁽¹⁾	Chief executive officer, Australian operations
TM Kenny ⁽²⁾	President and chief executive officer, the Americas
V McLenaghan ⁽³⁾	Chief operating officer, QBE Insurance Group Limited

(1) Mr Goodwin and Mr Ibbotson were appointed as key management personnel on 8 October 2007.

(2) Mr Kenny ceased employment on 12 September 2008.

(3) Mr McLenaghan is also currently acting president and chief executive officer of QBE the Americas.

(A) Remuneration framework

The remuneration committee of the board oversees remuneration practices. The committee assesses the appropriateness of remuneration policies and practices in order to fairly and responsibly reward executives, ensuring rewards are commensurate with performance and that remuneration levels are market competitive in the various markets in which the consolidated entity operates.

(i) Non-executive directors

Non-executive director remuneration reflects the consolidated entity's desire to attract, motivate and retain high quality directors and to ensure their active participation in the consolidated entity's affairs for the purposes of corporate governance, regulatory compliance and other matters. The consolidated entity aims to provide a level of remuneration for non-executive directors comparable with its peers, which include multi-national financial institutions. The board reviews surveys published by independent remuneration consultants and other public information to ensure that fees paid are appropriate.

(ii) Executives

Remuneration and reward philosophy

Remuneration practices vary in each of the markets within which the consolidated entity operates, and therefore the diversity of individual roles and the complexity of each operating environment is considered. The remuneration committee recognises that the consolidated entity operates in a competitive environment, where the key to achieving sustained performance is to generally retain quality employees and align executive reward with increasing shareholder wealth.

The guiding principles applied in managing remuneration and reward for executives combine:

- linking individual performance to the achievement of financial targets and business strategies;
- the achievement of short-term and long-term financial profit targets that deliver sustained growth in value for shareholders (e.g. return on equity, insurance profit, return on capacity for our Lloyd's business and investment performance); and
- using market data to set fixed annual remuneration levels.

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

The remuneration committee seeks the advice of independent remuneration consultants to ensure that remuneration and reward levels are appropriate and are in line with market conditions in the various markets in which the consolidated entity operates. The remuneration committee endeavours to have remuneration structures in place that encourage the achievement of a return for shareholders in terms of both dividends and growth in share price.

The remuneration committee reviews and approves the Short Term Incentive ("STI") scheme, the Deferred Compensation Plan ("DCP") and the Group Executive Restricted Share Plan ("GERSP") terms, details of which are set out below. It also approves the total quantum of short-term incentive, deferred compensation and restricted shares for Group executives based on the applicable audited results (other than the chief executive officer, whose quantum is approved by the board). The success of the schemes is demonstrated by the low turnover of senior employees and the wealth that has been created for shareholders, as demonstrated in the table on page 66.

Guidelines exist stating that directors and senior Group executives should notify any intended share transaction to nominated people within the Group, including hedging of vested entitlements. The guidelines prohibit the hedging of unvested entitlements.

Short Term Incentive scheme

The STI scheme is a short-term incentive arrangement in the form of an annual cash award, designed to reward both executives and the majority of employees. The STI aims to recognise the contributions and achievements of individuals when annual financial return on equity and investment income targets relating to the previous financial year's performance of the business unit, the division or the consolidated entity as appropriate are achieved or exceeded. The STI amounts included in the table on page 61 are contracted payments based on 2008 audited results.

Deferred Compensation Plan

Key management personnel (excluding non-executive directors), other executives and key senior employees are eligible to participate in the DCP. An executive is entitled to participate in the DCP only when the STI is earned. The DCP aims to attract and retain key executives and to increase shareholder value by motivating executives. For DCP awards made up to March 2009 in relation to financial performance for 2008 and prior years, it provides executives with the opportunity to acquire equity in the form of conditional rights to fully paid shares without payment by the executive and options to subscribe for shares at market value at the grant date.

For any DCP awards made in March 2010 in respect of 2009 financial year performance, executives will only receive conditional rights to fully paid shares as a result of approved changes to the DCP. The issue of options and interest free personal recourse loans will cease. Further details are provided in note 27 to the financial statements.

Group Executive Restricted Share Plan

Key management personnel (excluding executive and non-executive directors) and other Group executives are also eligible to participate in the GERSP which came into effect from 1 January 2008. The first award will be made in March 2009. The GERSP aims to retain and reward key executives and to increase shareholder value by motivating executives to exceed return on equity targets. It provides divisional executives with the opportunity to acquire additional equity in the form of restricted shares without payment by the executive if the consolidated entity exceeds the maximum target return on equity for STI and the division for which the relevant executive is responsible also exceeds a specified return on equity target for STI. For head office executives, awards will only be based on exceeding the consolidated entity's return on equity target. Further details are provided in note 27 to the financial statements.

Executive minimum shareholding requirement

With effect from 31 March 2008, a policy was introduced whereby key management personnel (excluding non-executive directors) and other Group executives are required to accumulate and maintain a minimum vested QBE shareholding equivalent to one years total remuneration cost ("TRC") by 31 December 2010. The executive minimum shareholding requirement encourages executives to actively build their shareholdings and ensures they have significant exposure to QBE share value and, by doing so, ensures their long-term interests are aligned with the best interests of shareholders.

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

(B) Remuneration and reward structure

(i) Non-executive directors

Non-executive director remuneration packages contain the following key elements:

COMPONENT	DESCRIPTION
Fees	Annual gross cash remuneration. The aggregate amount approved by shareholders at the 2007 AGM was \$2,700,000 per annum. The amount paid to individual non-executive directors may vary according to specific responsibilities, including involvement on the committees of the board. Non-executive directors may sacrifice future fees into the QBE non-executive directors' share plan.
Other benefits	Non-executive directors do not receive any performance based remuneration such as cash bonuses or equity incentives. Under the company's constitution, non-executive directors are entitled to be paid all travel and related expenses properly incurred in connection with the business of the company.
Superannuation	Annual cost of superannuation contributions. The consolidated entity pays superannuation of 9% or an equivalent to non-executive directors.
Other retirement benefits	Non-executive directors previously received a retirement allowance based on their period of service. The allowance was limited to the aggregate of the director's fees in the last three years of service, subject to a minimum of 10 years service. Where service was less than 10 years, a pro-rata amount was paid. With effect from 31 December 2003, the board terminated the retirement allowance to non-executive directors. Directors' fees were increased by 30% as compensation. Accrued retirement benefits at 31 December 2003 are preserved until retirement and are subject to an annual increase equal to the average five year Australian government bond rate. Shareholders approved an increase in non-executive directors' remuneration and the company's constitution was amended at the 2004 AGM to recognise this change.

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

(ii) Executives

Executive remuneration packages contain the following key elements:

STRUCTURE	COMPONENT	DESCRIPTION
Total remuneration cost	Base salary	Annual gross cash salary.
	Other benefits	Benefits such as the value of motor vehicles, long service leave, health insurance, life assurance and personal accident insurance, and the applicable taxes thereon.
	Superannuation	Annual cost of employer superannuation contributions.
At risk remuneration	Short-term incentives	Annual cash award delivered under the STI terms, substantially based on the achievement of specific financial targets. STI commences when the minimum profit target requirements are met for the previous financial year.
	Deferred compensation	<p>Deferred Compensation Plan</p> <p>Annual award delivered under the DCP terms, granting conditional rights to fully paid shares and options to subscribe for shares at market value at the grant date. The issue of options will cease as described below. The award is granted only when STI is earned.</p> <p>The DCP award amount is restricted to the lesser of 66.67% of the STI award in that year or 100% of base salary or TRC as at 31 December in the financial year prior to the year in which the STI award is paid.</p> <p>For DCP awards made up to March 2009 in relation to financial performance for 2008 and prior financial years, the DCP award amount is used to acquire conditional rights to fully paid shares and options respectively as follows:</p> <ul style="list-style-type: none"> conditional rights to shares to the value of 60% of the DCP award; and options over ordinary shares to the value of 40% of the DCP award, with the resulting number multiplied by three. <p>Conditional rights and options relating to the achievement of profit targets in the previous financial year are granted in March of the following year. Interest free personal recourse loans are available on terms permitted by the Plan to persons in the employment of the company who hold options under the DCP, to fund the exercise of the options.</p> <p>Conditional rights and options issued in 2004 and prior financial years are exercisable after three years. Options issued in 2005 and later financial years are exercisable after five years, with the exception of options for senior employees in the Group investment division which continue to be exercisable after three years. The issue of options and interest free personal recourse loans under the DCP will cease after the vesting of all 2008 financial year incentives as a result of approved changes to the Plan.</p> <p>For DCP awards made in March 2010 in respect of financial performance for 2009 and later financial years, executives will only receive conditional rights to fully paid shares. The DCP award will be based on an amount which is the lesser of 66.67% of the STI award in that year or 100% of base salary or TRC as at 31 December in the financial year prior to the year in which the STI award is paid.</p> <p>The DCP award amount will be used as the basis of calculating the number of conditional rights to fully paid shares as follows:</p> <ul style="list-style-type: none"> conditional rights to the value of 60% of the DCP award amount, converted to shares after three years; and conditional rights to the value of 60% of the DCP award amount, converted to shares after five years, with the exception of senior employees in the Group investment division, whose conditional rights continue to be converted to shares after three years. <p>Group Executive Restricted Share Plan</p> <p>Annual award delivered under the GERSP terms, granting restricted shares. The award is granted only when return on equity targets are exceeded. The value of the restricted shares allocated varies for each executive ranging from 3% to 50% of TRC. The restricted shares convert to fully paid shares after three years.</p>

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

(iii) Incentive structure – FM O'Halloran

Consistent with other executives, Mr O'Halloran is entitled to an annual cash incentive award under the STI scheme, calculated as a percentage of TRC, if specified targets are achieved. Mr O'Halloran's incentives are based on the achievement of a target return on opening shareholders' funds adjusted for dividends and increases in share capital ("return on equity") for the 2008 financial year, determined using the consolidated entity's management basis of accounting which spreads realised and unrealised gains on equities and properties evenly over a period of seven years ("seven year spread basis"). In addition, 2008 foreign exchange gains of \$380 million and a gain of \$303 million on the repurchase of debt securities have been spread over a seven year period.

The table below outlines Mr O'Halloran's incentives based on actual and target returns on equity:

	GROUP RETURN ON EQUITY %	STI AWARD AS A % OF TRC
Minimum target	14	15
Maximum target	21	134
Achieved	22.6	134

Mr O'Halloran, on a basis consistent with other executives, is also entitled to receive conditional rights to fully paid shares and options to subscribe for shares under the DCP in relation to 2008 performance. These will be exercisable in three and five years respectively or on Mr O'Halloran's retirement, whichever is earlier.

Based on the achievement of an actual return on equity of 22.6%, Mr O'Halloran will receive the following awards:

- a short-term incentive payment of \$2,807,000;
- conditional rights to fully paid shares under the terms of the DCP at no cost to him with a value of \$1,123,000. This equates to an award of 48,710 shares; and
- 97,420 options to subscribe for QBE shares under the terms of the DCP at an indicative exercise price of \$23.05 per share.

The actual share price used to determine the actual number of shares that will be issued to Mr O'Halloran in relation to his award of conditional rights and options will be the weighted average price of the company's ordinary shares traded on the ASX during the five trading days from 27 February 2009, being the date on which the consolidated entity's annual result is announced to the ASX. For indicative purposes, a share price of \$23.05 has been used above, being the weighted average price of the company's ordinary shares traded on the ASX during the five day period to 13 February 2009.

In previous years, approval of Mr O'Halloran's DCP entitlement was included in a resolution for consideration at the AGM. Consistent with the approach of many other listed companies, the remuneration committee considers that this is no longer appropriate. However, any shares issued to Mr O'Halloran on vesting of the 2008 DCP entitlement may require approval of shareholders at that time.

(iv) Incentive structure – other key management personnel

The table below summarises the financial targets for each executive defined as other key management personnel of the consolidated entity. These targets are generally consistent with the targets applicable to the chief executive officer. The results used for determining incentive payments and the maximum STI that can be earned for the 2008 financial year are generally expressed as a percentage of base salary or TRC as appropriate.

	FINANCIAL TARGET	MAXIMUM STI AS A % OF REMUNERATION	RESULT BASIS
Key management personnel			
SP Burns	European operations' return on equity	133.34% x TRC	Financial year result
NG Drabsch	QBE Group return on equity	117% x TRC	Financial year result (seven year spread basis)
MJ Goodwin ⁽¹⁾	Asia Pacific operations' return on equity	125% x overseas net salary	Financial year result
MD ten Hove	Investment income as a % of budget income and individual performance measures	125% x TRC	Financial year result
TW Ibbotson ⁽²⁾	Australian operations' return on equity	125% x TRC	Financial year result
TM Kenny ⁽³⁾	the Americas insurance profit	133% x TRC	Financial year result
V McLenaghan	QBE Group return on equity	133% x TRC	Financial year result (seven year spread basis)

(1) Mr Goodwin is based in Singapore and was appointed to the role of chief executive officer for Asia Pacific operations on 8 October 2007. His STI is calculated using his assignment net salary (excluding any positive cost of living adjustment).

(2) Mr Ibbotson was appointed to the role of chief executive officer of Australian operations on 8 October 2007. His STI is calculated using his plan salary.

(3) Mr Kenny ceased employment on 12 September 2008.

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

(C) Employment agreements

Mr O'Halloran (executive director) and other key management personnel are employed by various controlled entities within the consolidated entity on a permanent full time basis with an open ended contract. Upon termination of employment, the executive director and other key management personnel receive their statutory entitlements of accrued annual and long service leave (where applicable), together with any superannuation benefits. Written notice is usually required in the event of termination of employment. In the case of a voluntary termination prior to retirement age, executives forfeit all conditional rights to ordinary shares not yet vested and unexercised options under the DCP.

In the event that the contract of employment is terminated through redundancy, retirement through ill health or age (subject to a minimum of 10 years service) or death and no disciplinary procedure or notice is pending, the executive is entitled to the outstanding STI and DCP awards for previous years plus a pro-rata share of the STI and conditional rights for the current financial year.

For certain executives (including some key management personnel), the controlled entities have entered into employment agreements that provide for payment of benefits in the event that the agreement is terminated by either the controlled entity or the executive. The agreements generally provide for the following:

- a notice period up to one year;
- where the controlled entity terminates the agreement, a payment comprised of TRC or base salary as appropriate plus STI for the relevant period; and
- in certain circumstances, where the controlled entity or the executive terminates the agreement due to material diminution in role, a payment of up to one year's TRC or base salary as appropriate plus STI for the relevant period.

The following specific arrangements exist in addition to the general provisions described above:

Subject to the achievement of financial hurdles, Mr Burns will receive a contractually agreed bonus payment on 31 December 2010 of one year's TRC. In addition, 100,000 future performance options are being granted at \$20.44 in tranches of 20,000 over a five year period from March 2007 and vesting within three months of 31 December 2010.

In addition to his annual award under the DCP, Mr Burns will be eligible to receive an additional award of restricted shares to the value of \$1,205,000 in March 2009 as a result of the European operations' result exceeding the maximum target return on equity for the 2008 financial year. The restricted shares will vest in three years after the grant date.

In addition to their annual award under the DCP, all key management personnel (except for Mr O'Halloran and Mr Burns) will be eligible to receive an additional award of restricted shares under the GERSP for values ranging from \$46,000 to \$168,000 in March 2009 as a result of the relevant divisional and consolidated entity results exceeding the maximum target return on equity for the 2008 financial year. The restricted shares will vest three years after the grant date.

In addition to his annual awards under the DCP and GERSP, Mr McLenaghan was granted 20,000 conditional rights on 1 January 2009 which will vest in March 2012. They are in recognition of his additional responsibilities as acting president and chief executive officer in the Americas.

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

(D) Remuneration details

The following tables provide details of the remuneration of key management personnel of the consolidated entity.

(i) Non-executive directors

	YEAR	SHORT-TERM EMPLOYEE BENEFITS	POST EMPLOYMENT BENEFITS		TOTAL \$'000
		DIRECTORS' FEES ⁽¹⁾ \$'000	SUPER- ANNUATION ⁽²⁾ \$'000	RETIREMENT BENEFITS ⁽³⁾ \$'000	
LF Bleasel AM	2008	241	22	7	270
	2007	221	20	7	248
DM Boyle	2008	233	21	–	254
	2007	214	19	–	233
EJ Cloney	2008	589	53	30	672
	2007	544	49	30	623

IYL Lee	2008	253	23	4	280
	2007	235	21	5	261
Total	2008	2,149	141	62	2,352
	2007	1,966	134	70	2,170

(1) Includes fees paid for services on board committees.

(2) Mr Irby and Ms Hudson are UK residents. In lieu of superannuation, they receive an equivalent amount being 9% of fees which is included in directors' fees in the table above.

(3) Retirement benefits reflect the adjustment to the amounts preserved at 31 December 2003, being an annual increase equal to the five year Australian government bond rate.

(4) The Hon NF Greiner AC retired on 4 April 2007.

The non-executive directors have agreed that their total fees payable will be increased by 3% in 2009.

(ii) Executive director and other key management personnel

2008 remuneration for key management personnel (excluding the non-executive directors) is set out in the table on page 61.

Short-term and long-term employee benefits and share based payments are individually identified and were determined based on performance criteria established in 2007, mainly the achievement of a minimum return on equity. Details of performance targets are provided on page 58.

Approximately 67% of remuneration for executive key management personnel is at risk and is directly related to the achievement of return on equity targets. Details are included on page 65.

QBE's results in 2008 were superior to the great majority of companies in the global insurance sector as evidenced by the return on average shareholders' funds of 20.9% (2007 26.1%) and the return on equity of 22.6% (2007 28.4%) on a seven year spread basis of accounting.

	2007	7,229	2,088	10,954	789	305	3,672	1,416	–	26,453

- (1) The fair value at grant date of options and conditional rights is calculated using a binomial model. The fair value of each option and conditional right is earned evenly over the period between grant and vesting which is three years for conditional rights and three or five years for options. Details of grants of conditional rights and options are provided in note 28 to the financial statements.
- (2) "Other" includes the deemed value of the provision of motor vehicles, health insurance, life assurance and personal accident insurance and the applicable taxes thereon. It also includes interest on share loans, also disclosed in note 28(E) to the financial statements. Directors' and officers' liability insurance has not been included in other remuneration since it is not possible to determine an appropriate allocation basis.
- (3) STI is the accrued entitlement for the financial year.
- (4) Mr Burns is located in London. His remuneration has been converted to Australian dollars using the cumulative average rate of exchange for the year.
- (5) Mr Goodwin was appointed as chief executive officer of Asia Pacific operations on 8 October 2007. Before this appointment, he was the chief operating officer for the same division. In 2007, Mr Goodwin's total remuneration is shown, whether as key management personnel or otherwise. Amounts received in his position as key management personnel amounted to \$302,000, comprising: base salary of \$115,000; other short-term employee benefits of \$37,000; superannuation of \$14,000; and STI of \$136,000.
- (6) Mr Ibbotson was appointed as chief executive officer of Australian operations on 8 October 2007. Before this appointment, he was the chief operating officer for the same division. In 2007, Mr Ibbotson's total remuneration is shown, whether as key management personnel or otherwise. Amounts received in his position as key management personnel amounted to \$374,000, comprising: base salary of \$139,000; other short-term employee benefits of \$24,000; superannuation of \$24,000; and STI of \$187,000.
- (7) Mr Kenny ceased employment on 12 September 2008. He was located in New York and his remuneration has been converted to Australian dollars using the cumulative average rate of exchange for the year. Mr Kenny has no entitlement to an award under the terms of the DCP for 2008 financial year performance.
- (8) Included in termination benefits is the cost attributable to the accelerated recognition of conditional rights and options where the terms of Mr Kenny's departure permitted exercise of these instruments before the original exercise date. These instruments will vest and become exercisable on 31 March 2009. Also included in termination benefits is an amount of \$1,223,000 which Mr Kenny is entitled to receive on 31 March 2009.
- (9) In the event that Mr Kenny does not receive comparable benefits from a new employer, he will be entitled to reimbursement from the consolidated entity of health care premiums up to a maximum of US\$25,000 per annum for a period of three years. In addition, the consolidated entity has agreed to reimburse Mr Kenny up to US\$23,000 per annum for a five year period to 2013 for life insurance premiums if equivalent benefits are not made available by a new employer. These amounts are not included in the table above.

The directors have approved increases to TRC up to a maximum 3% for the executive director and other key management personnel in 2009.

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

(E) Share based compensation

(i) Options

DCP options

DCP options affecting remuneration of key management personnel in the previous, this or future reporting periods are as follows:

GRANT DATE	DATE EXERCISABLE	EXPIRY DATE	EXERCISE PRICE	VALUE PER OPTION AT GRANT DATE ⁽¹⁾
13 March 2003	13 March 2006	13 March 2007	\$8.04	\$1.45
10 April 2003	9 April 2006	10 April 2007	\$8.04	\$1.74
3 March 2004	2 March 2007	3 March 2008	\$8.04	\$3.61
3 March 2004	2 March 2007	3 March 2008	\$11.08	\$2.12
2 April 2004	1 April 2007	2 April 2008	\$11.08	\$2.23
3 March 2005	3 March 2008	3 March 2009	\$14.85	\$3.04
3 March 2005	3 March 2010	3 March 2011	\$8.04	\$6.90
3 March 2005	3 March 2010	3 March 2011	\$11.08	\$5.17
3 March 2005	3 March 2010	3 March 2011	\$14.85	\$3.60
8 April 2005	8 April 2010	8 April 2011	\$14.85	\$3.60
2 March 2006	2 March 2009	2 March 2010	\$20.44	\$3.85
2 March 2006	1 March 2011	2 March 2012	\$20.44	\$4.58
7 April 2006	6 April 2011	7 April 2012	\$20.44	\$5.63
2 March 2007	1 March 2010	2 March 2011	\$32.68	\$5.05
2 March 2007	1 March 2012	2 March 2013	\$32.68	\$6.28
4 April 2007	3 April 2012	4 April 2013	\$32.68	\$6.28
4 March 2008	3 March 2011	3 March 2012	\$24.22	\$3.98
4 March 2008	4 March 2013	4 March 2014	\$24.22	\$4.63
4 April 2008	3 April 2013	4 April 2014	\$27.00	\$5.16

(1) The fair value at grant date of DCP options is calculated using a binomial model. The fair value of each option is earned evenly over the three or five year period between grant and vesting.

Details of DCP options over the ordinary shares in the company provided as remuneration to the key management personnel are set out below. When exercisable, each option is convertible into one ordinary share of the company.

NAME	NUMBER OF OPTIONS GRANTED IN THE YEAR		NUMBER OF OPTIONS VESTED AND EXERCISED IN THE YEAR	
	2008	2007	2008 ⁽¹⁾	2007 ⁽²⁾
Executive director				
FM O'Halloran	74,257	51,125	–	114,694
Other key management personnel				
SP Burns	76,700	61,031	–	148,038
NG Drabsch	35,169	24,776	–	68,399
MJ Goodwin	7,934	2,968	–	13,978
MD ten Hove	37,161	23,654	66,707	–
TW Ibbotson	19,187	12,088	–	23,715
TM Kenny ⁽³⁾	51,941	31,910	–	87,218
V McLenaghan	42,835	26,052	–	49,810

(1) In 2008, Mr ten Hove exercised 66,707 options at a cost per option of \$14.85. No other options were exercised.

(2) In 2007, Mr Burns exercised 79,085 options at a cost per option of \$8.04. All other options were exercised at a cost per option of \$11.08.

(3) Mr Kenny ceased employment on 12 September 2008. All DCP options granted up to 12 September 2008 and unvested at the balance sheet date will vest and become exercisable on 31 March 2009.

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

Future performance options

Future performance options affecting remuneration of key management personnel in the previous, this or future reporting periods are as follows:

GRANT DATE	DATE EXERCISABLE	EXPIRY DATE	EXERCISE PRICE	VALUE PER RIGHT AT GRANT DATE ⁽¹⁾
10 December 2001	31 March 2007	1 April 2007	\$7.27	\$1.62
12 May 2005	20% in December each year	30 December 2009	\$14.81	\$2.32
2 March 2007	Within three months of 31 December 2010	1 April 2011	\$20.44	\$12.55
4 March 2008	Within three months of 31 December 2010	1 April 2011	\$20.44	\$3.36

(1) The fair value at grant date of options is calculated using a binomial model. The fair value of each option is earned evenly over the period between grant and vesting.

The specific terms and conditions of each grant of future performance options that affect remuneration of the key management personnel in the previous, this or future reporting periods are as follows:

GRANT DATE	PERFORMANCE CRITERIA	NAME	NUMBER OF OPTIONS GRANTED
10 December 2001	Lloyd's division to achieve an average 5% return on capacity for five years from and including the 2002 underwriting year	SP Burns	80,000 ⁽¹⁾
	QBE the Americas to achieve an average insurance profit of 5% for underwriting years 2002 to 2006	TM Kenny ⁽⁴⁾	100,000 ⁽¹⁾
12 May 2005	QBE the Americas to achieve an average insurance profit of 7% of net earned premium for the five underwriting years commencing 1 January 2001	TM Kenny ⁽⁴⁾	100,000 ^(2,3)
2 March 2007	European operations to achieve an average insurance profit of 8% for underwriting years 2006 to 2010	SP Burns	20,000
	QBE the Americas to achieve an average insurance profit of 8% for underwriting years 2006 to 2010	TM Kenny ⁽⁴⁾	20,000
4 March 2008	European operations to achieve an average insurance profit of 8% for underwriting years 2006 to 2010	SP Burns	20,000
	QBE the Americas to achieve an average insurance profit of 8% for underwriting years 2006 to 2010	TM Kenny ⁽⁴⁾	20,000

(1) These options vested and were exercised in 2007 at \$7.27 each.

(2) 20,000 of these options vested in 2007 and remain unexercised at the date of this report.

(3) Mr Kenny exercised 20,000 options in 2007 at \$14.81.

(4) Mr Kenny ceased employment on 12 September 2008. All unvested future performance options granted up to 12 September 2008 will vest and become exercisable on 31 March 2009.

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

(ii) Conditional rights

Details of conditional rights affecting remuneration of key management personnel in the previous, this or future reporting periods are as follows:

GRANT DATE	DATE EXERCISABLE	VALUE PER RIGHT AT GRANT DATE ⁽¹⁾
3 March 2004	2 March 2007	\$11.65 to \$13.24
2 April 2004	2 April 2007	\$12.49
3 March 2005	3 March 2008	\$15.30 to \$17.81
8 April 2005	7 April 2008	\$16.94
2 March 2006	2 March 2009	\$23.09
7 April 2006	6 April 2009	\$24.23
2 March 2007	1 March 2010	\$32.68
4 April 2007	2 April 2010	\$32.68
4 March 2008	3 March 2011	\$24.22
4 April 2008	4 April 2011	\$27.00

(1) The fair value at grant date of conditional rights is calculated using a binomial model. The fair value of each conditional right is earned evenly over the three year period between grant and vesting.

Details of conditional rights to ordinary shares in the company provided as remuneration to the key management personnel are set out below. When exercisable, each conditional right is convertible into one ordinary share of the company.

	NUMBER OF RIGHTS GRANTED IN THE YEAR		NUMBER OF RIGHTS VESTED IN THE YEAR	
	2008	2007	2008	2007
Executive director				
FM O'Halloran	37,128	25,563	50,142	48,156
Other key management personnel				
SP Burns	80,963⁽²⁾	30,516	68,469	62,291

MD ten Hove	18,581	11,827	27,930	–
TW Ibbotson	9,594	6,044	11,627	9,978
TM Kenny ⁽¹⁾	25,970	15,955	31,718	36,700
V McLenaghan	21,417	13,026	20,302	20,960

(1) Mr Kenny ceased employment on 12 September 2008. All conditional rights granted up to 12 September 2008 and unvested at the balance sheet date will vest and become exercisable on 31 March 2009.

(2) Includes 42,613 restricted shares which have the same terms and conditions as conditional rights to ordinary shares in the company.

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

(F) At risk remuneration

Total maximum potential reward mix

Consistent with market practice, the mix of total remuneration and reward is dependent on the level of seniority of the executive.

Total maximum potential reward mix for the current and prior reporting periods is as follows:

TOTAL REWARD MIX	2008 ⁽¹⁾			2007 ⁽²⁾		
	TRC/BASE %	STI %	DCP %	TRC/BASE %	STI %	DCP %

Mr Kenny ceased employment on 12 September 2008 and is therefore not included in the above table.

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

(H) Relationship between remuneration and company performance

Remuneration and reward structures encourage the achievement of a return for shareholders in terms of both dividends and growth in share price. A significant component of executive remuneration is "at risk", ensuring a direct link between the consolidated entity's performance and the reward for executives. Details of "at risk" remuneration are included earlier in this report. Overall levels of executive reward take into account the performance of the Group over a number of years, with greater emphasis given to the current year. The use of financial profit targets ensures that executives focus on delivering superior returns to shareholders.

Over the period from 2004 to 2008:

- the consolidated entity's net profit after income tax increased by an average of 21% per annum;
- dividends per share increased by an average of 24% per annum; and
- the share price increased from \$15.35 to \$25.81, an average of 14% per annum.

During the same period, average executive remuneration including at risk remuneration grew by approximately 16% per annum.

The consolidated entity's strong results in the last five years across a number of key performance indicators are summarised below:

	2004	2005	2006	2007	2008
Earnings					
Net profit after income tax (\$M)	857	1,091	1,483	1,925	1,859
Basic earnings per share (cents)	123.4	144.3	186.4	225.7	208.8
Return on equity					
Return on average shareholders' funds (%)	24.5	23.9	26.1	26.1	20.9
Return on equity (seven year spread basis) (%)	22.8	26.3	29.3	28.4	22.6
Returns to shareholders					
Dividends paid (cents per share)	54.0	71.0	95.0	122.0	126.0
Share price at 31 December (\$ per share)	15.35	19.60	28.85	33.34	25.81

Directors' report

FOR THE YEAR ENDED 31 DECEMBER 2008

AUDITOR

PricewaterhouseCoopers, Chartered Accountants, continues in office in accordance with section 327B of the *Corporations Act 2001*.

NON-AUDIT SERVICES

During the year PricewaterhouseCoopers has performed certain other services in addition to its statutory duties.

The board of directors has considered the position and, in accordance with the advice received from the audit committee, is satisfied that the provision of the non-audit services is compatible with the general standard of independence for auditors imposed by the *Corporations Act 2001*. The directors are satisfied that the provision of non-audit services by the auditor, as provided in note 30 to the financial statements, did not compromise the auditor independence requirements of the *Corporations Act 2001* for the following reasons:

- all non-audit services have been reviewed by the audit committee to ensure that they do not impact the impartiality and objectivity of the auditor; and
- none of the services undermine the general principles relating to auditor independence as set out in APES 110: Code of Ethics for Professional Accountants.

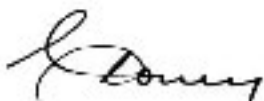

A copy of the auditor's independence declaration required under section 307C of the *Corporations Act 2001* is set out on page 68.

Details of amounts paid or payable to PricewaterhouseCoopers for audit and non-audit services are provided in note 30 to the financial statements.

ROUNDING OF AMOUNTS

The company is of a kind referred to in the ASIC class order 98/0100 dated 10 July 1998 (as amended by class order 04/667 dated 15 July 2004) relating to the "rounding off" of amounts in the directors' report. Amounts have been rounded off in the directors' report to the nearest million dollars or, in certain cases, to the nearest thousand dollars in accordance with that class order.

Signed in SYDNEY this 27th day of February 2009 in accordance with a resolution of the directors.

AUDITOR'S INDEPENDENCE DECLARATION FOR THE YEAR ENDED 31 DECEMBER 2008

As lead auditor for the audit of QBE Insurance Group Limited for the year ended 31 December 2008, I declare that, to the best of my knowledge and belief, there have been:

- (a) no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the audit; and
- (b) no contraventions of any applicable code of professional conduct in relation to the audit.

This declaration is in respect of QBE Insurance Group Limited and the entities it controlled during the period.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

1

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of the financial report are set out below. These policies have been consistently applied to all the years presented unless otherwise stated. The financial report includes separate financial statements for QBE Insurance Group Limited ("the company") as an individual entity and the consolidated entity consisting of QBE Insurance Group Limited and its controlled entities.

(A) Basis of preparation

This general purpose financial report has been prepared in accordance with Australian equivalents to International Financial Reporting Standards ("AIFRS"), other authoritative pronouncements of the Australian Accounting Standards Board ("AASB"), AASB Interpretations and the *Corporations Act 2001*.

Compliance with AIFRS ensures that the consolidated financial statements and notes of the consolidated entity comply with International Financial Reporting Standards ("IFRS"). The company financial statements and notes also comply with IFRS except that it has elected to apply the relief provided to parent entities in respect of certain disclosure requirements contained in AASB 132: Financial Instruments: Disclosure and Presentation.

These financial statements have been prepared under the historical cost convention, as modified by the revaluation of:

- financial assets and liabilities (including derivative instruments) at fair value through profit or loss;
- certain classes of property, plant and equipment; and
- investment property.

(B) Principles of consolidation

The consolidated financial statements incorporate the assets and liabilities of all entities controlled by the company as at 31 December 2008 and the results of all controlled entities for the financial year then ended. The company and its controlled entities together are referred to in this financial report as the "consolidated entity". The effects of all transactions between entities in the consolidated entity are eliminated in full. Minority interest in the results and equity of controlled entities is shown separately in the consolidated income statement and balance sheet.

Where control of an entity commences during a financial year, its results are included in the consolidated income statement from the date on which the control commences. Where control of an entity ceases during a financial year, its results are included for that part of the year during which the control existed.

The purchase method of accounting is used to account for the acquisition of controlled entities by the consolidated entity. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any minority interest. The excess of the cost of acquisition over the fair

value of the consolidated entity's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the controlled entity acquired, the difference is recognised directly in the income statement.

(C) Premium revenue

Premium comprises amounts charged to policyholders, excluding taxes collected on behalf of third parties. The earned portion of premium received and receivable, including unclosed business, is recognised as revenue. Premium on unclosed business is brought to account based upon the pattern of booking of renewals and new business.

(D) Unearned premium

Unearned premium is calculated based on the term of the risk which closely approximates the pattern of risks underwritten using either the daily pro-rata method or the 24ths method.

At each balance sheet date, the adequacy of the unearned premium liability is assessed on a net of reinsurance basis against the present value of the expected future cash flows relating to potential future claims in respect of the relevant insurance contracts, plus an additional risk margin to reflect the inherent uncertainty of the central estimate. The assessment is carried out at the divisional business segment level, being a portfolio of contracts that are broadly similar and managed together as a single portfolio. If the unearned premium liability, less related intangible assets and deferred acquisition costs, is deficient, then the resulting deficiency is recognised in the income statement of the consolidated entity.

(E) Outward reinsurance

Premium ceded to reinsurers is recognised as an expense in accordance with the pattern of reinsurance service received. Accordingly, a portion of outward reinsurance premium is treated as a prepayment at the balance sheet date.

(F) Claims

The provision for outstanding claims is measured as the central estimate of the present value of expected future claims payments plus a risk margin. The expected future payments include those in relation to claims reported but not yet paid; claims incurred but not reported ("IBNR"); claims incurred but not enough reported ("IBNER"); and estimated claims handling costs. Claims expense represents claim payments adjusted for the movement in the outstanding claims liability.

The expected future payments are discounted to present value using a risk-free rate.

A risk margin is applied to the central estimate, net of reinsurance and other recoveries, to reflect the inherent uncertainty in the central estimate.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

1

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES CONTINUED

(G) Reinsurance and other recoveries

Reinsurance and other recoveries on paid claims, reported claims not yet paid, IBNR and IBNER are recognised as revenue.

Amounts recoverable are assessed in a manner similar to the assessment of outstanding claims. Recoveries are measured as the present value of the expected future receipts, calculated on the same basis as the provision for outstanding claims.

(H) Acquisition costs

A portion of acquisition costs relating to unearned premium is deferred in recognition that it represents a future benefit. Deferred acquisition costs are measured at the lower of cost and recoverable amount. Deferred acquisition costs are amortised on a straight line basis over the financial years expected to benefit from the expenditure.

(I) Investment income

Interest income is recognised on an accruals basis. Dividends are recognised when the right to receive payment is established. Investment income includes realised and unrealised gains or losses on financial assets which are reported on a combined basis as fair value gains or losses on financial assets.

Investment income on ABC financial assets pledged for funds at Lloyd's and expenses relating to ABC securities for funds at Lloyd's, both of which are separately identified, include fair value gains and losses on the ABC swaps.

(J) Taxation

The income tax expense for the period is the tax payable on the current period's taxable income based on the notional income tax rate for each jurisdiction, adjusted for changes in deferred tax assets and liabilities attributable to temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements.

Deferred tax assets and liabilities are recognised for temporary differences at the tax rate expected to apply when the assets are recovered or liabilities are settled, based on those tax rates which are enacted or substantively enacted for each jurisdiction. The relevant tax rates are applied to the cumulative amounts of deductible and taxable temporary differences to measure the deferred tax asset or liability. An exception is made for certain temporary differences arising from the initial recognition of an asset or liability. No deferred tax asset or liability is recognised in relation to these temporary differences if they arose in a transaction, other than a business combination, that at the time of the transaction did not affect either accounting or taxable profit or loss.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are not recognised for temporary differences between the carrying amount and tax bases of investments in controlled entities where the parent

entity is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the near future.

Current and deferred tax balances attributable to amounts recognised directly in equity are also recognised directly in equity.

The company and all of its Australian wholly-owned controlled entities ("Australian entities") have implemented the tax consolidation legislation. The company is the head entity in a tax-consolidated group comprising the company and the Australian entities. All entities in the tax-consolidated group continue to account for their own current and deferred tax amounts. These tax amounts are measured as if each entity continues to be a stand-alone tax payer in its own right. In addition to its own current and deferred tax amounts, the company also recognises any current tax or deferred tax arising from unused tax losses and unused tax credits assumed from controlled entities in the tax-consolidated group. Details of the tax funding agreement are included in note 8 to the financial statements.

(K) Financial instruments

A financial instrument is any contract that gives rise to a financial asset in one entity and a financial liability or equity instrument in another entity.

(i) Financial assets

The company and consolidated entity have identified the following classes of financial asset: cash and cash equivalents; investments; ABC financial assets pledged for funds at Lloyd's; derivative financial instruments; swaps relating to ABC securities; and receivables.

(ii) Financial liabilities

The company and consolidated entity have identified the following classes of financial liability: derivative financial instruments; swaps relating to ABC securities; trade and other payables; ABC securities for funds at Lloyd's; and borrowings.

(iii) Financial instruments designated as fair value through profit or loss

The policy of management is to designate a group of financial assets or financial liabilities as fair value through profit or loss when that group is both managed and its performance evaluated on a fair value basis for both internal and external reporting in accordance with the consolidated entity's documented investment strategy.

(L) Policyholders' and shareholders' funds

Policyholders' funds are those financial assets which are held to fund the insurance provisions of the consolidated entity. The remaining financial assets and investment properties (refer note 1(T)) represent shareholders' funds. Insurance profit is derived by adding investment income on policyholders' funds to the underwriting result.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

1

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES CONTINUED

(M) Cash and cash equivalents

Cash and cash equivalents includes cash at bank and on hand and deposits at call which are readily convertible to cash on hand and which are used in the cash management function on a day to day basis.

(N) Investments

All investments are designated as fair value through profit or loss on initial recognition. They are initially recorded at fair value and are subsequently remeasured to fair value at each reporting date. Fair value for each type of investment is determined as follows:

Listed investments – by reference to the closing bid price of the instrument at the balance sheet date.

Unlisted investments – the fair value of investments not traded on an active market is determined using valuation techniques including reference to:

- the fair value of recent arm's length transactions involving the same instrument or instruments that are substantially the same;
- discounted cash flow analysis; and
- option pricing models.

All purchases and sales of investments that require delivery of the asset within the time frame established by regulation or market convention ("regular way" transactions) are recognised at trade date, being the date on which the consolidated entity commits to buy or sell the asset.

Investments are derecognised when the right to receive future cash flows from the asset has expired or has been transferred and the consolidated entity has transferred substantially all the risks and rewards of ownership.

(O) Derivative financial instruments

The consolidated entity is subject to currency, interest rate, price, credit and liquidity risks. Derivative financial instruments ("derivatives") are used to manage these risks. The consolidated entity does not enter into, issue or hold derivatives for speculative trading purposes.

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured to their fair value. The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument and the nature of the item being hedged. Derivatives which are not part of a hedging relationship are valued at fair value through profit or loss. Derivatives which are part of a hedging relationship are accounted for as set out in note 1(P).

The fair value of derivatives traded in active markets is based on quoted market prices at the balance sheet date. The fair value of derivatives not traded in active markets is determined using valuation techniques including the use of forward exchange rates for the valuation of forward foreign exchange contracts.

(P) Hedging transactions

Derivatives held for risk management purposes which meet the criteria specified in AASB 139: Financial Instruments: Recognition and Measurement ("AASB 139") are accounted for by the consolidated entity using fair value hedge accounting, cash flow hedge accounting or hedging of a net investment in a foreign operation as appropriate to the risks being hedged.

When a financial instrument is designated as a hedge, the consolidated entity formally documents the relationship between the hedging instrument and hedged item as well as its risk management objectives and its strategy for undertaking the various hedging transactions. The consolidated entity also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used for hedging are highly effective in offsetting changes in fair values or cash flows of hedged items.

Hedge accounting is discontinued when:

- it is determined that a derivative is not, or has ceased to be, highly effective as a hedge;
- the derivative expires or is sold, terminated or exercised; or
- the hedged item matures, is sold or repaid.

(i) Fair value hedge accounting

Changes in the fair value of derivatives that qualify and are designated as fair value hedges are recorded in the income statement, together with changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. If the hedge no longer meets the criteria for hedge accounting, the fair value hedging adjustment cumulatively made to the carrying value of the hedged item is, for items carried at amortised cost, amortised over the period to maturity of the previously designated hedge relationship using the effective interest method. If the hedged item is sold or repaid, the unamortised fair value adjustment is recognised immediately in the income statement.

(ii) Cash flow hedge accounting

For qualifying cash flow hedges, the fair value gain or loss associated with the effective portion of the cash flow hedge is recognised initially directly in shareholders' equity and transferred to the income statement in the period when the hedged item will affect profit or loss. The gain or loss on any ineffective portion of the hedging instrument is recognised in the income statement immediately. When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognised when the hedged item affects the income statement. When a transaction is no longer expected to occur, the cumulative gain or loss that was recognised in equity is immediately transferred to the income statement.

(iii) Hedges of net investments in foreign operations

Hedges of net investments in foreign operations are accounted for in a manner similar to cash flow hedges. The gain or loss on the effective portion of the hedging instrument is recognised directly in equity and the gain or loss on the ineffective

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

1

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES CONTINUED

portion is recognised immediately in the income statement. The cumulative gain or loss previously recognised in equity is recognised in the income statement on the disposal or partial disposal of the foreign operation.

(Q) Receivables

Receivables are measured at fair value through profit or loss. A provision for impairment is established when there is objective evidence that the consolidated entity will not be able to collect all amounts due according to the original term of the receivable. Any increase or decrease in the provision for impairment is recognised in the income statement within underwriting expenses. When a receivable is uncollectible, it is written off against the provision for impairment account. Subsequent recoveries of amounts previously written off are credited against underwriting expenses in the income statement.

(R) Borrowings

Borrowings are initially measured at fair value and are subsequently measured at amortised cost. Any difference between the proceeds and the redemption amount is recognised in the income statement over the period of the financial liability using the effective interest method.

On issue of hybrid securities, the fair value of the liability component, being the obligation to make future payments of principal and interest to investors, is calculated using a market interest rate for an equivalent non-convertible note. The residual amount, representing the fair value of the conversion option, is included in equity with no recognition of any change in the value of the option in subsequent periods. The liability is included in borrowings and carried on an amortised cost basis with interest on the securities recognised as financing costs using the effective interest method until the liability is extinguished on conversion or maturity of the securities.

(S) Asset Backed Capital ("ABC") transactions

(i) ABC financial assets pledged for funds at Lloyd's

ABC financial assets pledged for funds at Lloyd's are managed and performance is evaluated on a fair value basis for both internal and external reporting in accordance with the consolidated entity's documented investment strategy. ABC financial assets are initially recorded at fair value and are subsequently remeasured to fair value at each reporting date.

(ii) ABC securities for funds at Lloyd's

ABC securities are initially measured at fair value and are subsequently measured at amortised cost. Any difference between the proceeds and the redemption amount is recognised in the income statement over the period of the financial liability using the effective interest method.

(iii) Swaps relating to ABC securities

Swaps relating to ABC securities are initially recognised at fair value on the date the agreements are entered into and are subsequently remeasured to their fair value. The method of recognising the resulting gain or loss depends on whether the swap is designated as a hedging instrument and the nature of the item being hedged. Swaps which are not part of a hedging relationship are valued at fair value through profit or loss. Swaps which are part of a hedging relationship are accounted for as set out in note 1(P).

(T) Investment properties

Investment properties are valued by reference to external market valuations at fair value through profit or loss.

(U) Property, plant and equipment

Owner occupied properties are measured at fair value by reference to external market valuations. When a revaluation increases the carrying value of a property, the increase is credited to the revaluation reserve in equity. To the extent that the increase reverses a decrease previously recognised in the income statement, the increase is first recognised in the income statement. When an asset's carrying amount is decreased as a result of a revaluation, the decrease is recognised in the income statement. To the extent that the decrease reverses an increase previously recognised in equity, the decrease is first recognised in equity.

All other plant and equipment is stated at historical cost less accumulated depreciation.

Leasehold improvements, office equipment, fixtures and fittings and motor vehicles are depreciated using the straight line method over the estimated useful life to the consolidated entity of each class of asset. Estimated useful lives are between three and 10 years for all classes.

An asset's carrying amount is written down to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. Refer note 1(W).

(V) Intangible assets

(i) Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the consolidated entity's share of the net identifiable assets acquired. Goodwill acquired in a business combination is tested for impairment and is not subject to amortisation.

(ii) Intangible assets

Intangible assets are measured at cost. Those with a finite useful life are amortised using the straight line method over the estimated useful life. Estimated useful lives are between four and 21 years. Intangible assets with an indefinite useful life are not subject to amortisation but are tested for impairment annually or more often if there is an indication of impairment.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

1

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES CONTINUED

(W) Impairment of assets

Assets, including goodwill and intangibles, that have an indefinite useful life are tested annually for impairment or more frequently when changes in circumstances indicate that the carrying amount may not be recoverable. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised as the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and its value in use. For the purposes of assessing impairment, assets are grouped in cash generating units which are the lowest levels for which there are separately identifiable cash flows.

(X) Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements of controlled entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The consolidated entity's financial statements are presented in Australian dollars, being the functional and presentation currency of the company.

(ii) Translation of foreign currency transactions and balances

Foreign currency transactions are translated into functional currencies at the rates of exchange at the dates of the transactions. At the balance sheet date, monetary assets and liabilities denominated in foreign currencies are translated at the rates of exchange prevailing at that date. Resulting exchange gains and losses are included in the income statement.

(iii) Translation of overseas controlled entities

The results and balance sheets of all overseas controlled entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- assets and liabilities are translated at the closing balance sheet date rates of exchange;
- income and expenses are translated at cumulative average rates of exchange; and
- all resulting exchange differences are recognised as a separate component of equity.

On consolidation, exchange differences arising from the translation of the net investment in overseas controlled entities, and of financial liabilities and other instruments designated as hedges of such investments, are taken to shareholders' equity. When an overseas controlled entity is sold, these exchange differences are recognised in the income statement as part of the gain or loss on sale.

(iv) Hedging transactions

Derivatives are used to hedge the foreign exchange risk relating to certain transactions. Refer to note 1(P).

(Y) Equity

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction from the proceeds, net of tax. Incremental costs directly attributable to the issue of new shares or options, or for the acquisition of a business, are included in the cost of acquisition as part of the purchase consideration.

The equity component of hybrid securities is calculated and disclosed as set out in note 1(R).

(Z) Earnings per share

(i) Basic earnings per share

Basic earnings per share is determined by dividing net profit after income tax attributable to members of the company, adjusted for the cost of servicing equity other than ordinary shares, by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the year.

(ii) Diluted earnings per share

Diluted earnings per share adjusts the earnings figure used in the determination of basic earnings per share to exclude the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration. It also adjusts the weighted average number of shares to include dilutive potential ordinary shares and instruments with a mandatory conversion feature.

(AA) Dividends

Provision is made for dividends which are declared, being appropriately authorised and no longer at the discretion of the entity, on or before the end of the financial year but not distributed at the balance sheet date.

(AB) Employee benefits

(i) Superannuation

The consolidated entity participates in a number of superannuation plans and contributes to these plans in accordance with plan rules and actuarial recommendations, which are designed to ensure that each plan's funding provides sufficient assets to meet its liabilities.

Defined contribution plans

Contributions to defined contribution plans are expensed as incurred.

Notes to the Financial Statements

FOR THE YEAR ENDED 31 DECEMBER 2008

1

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES CONTINUED

Defined benefit plans

The liability recognised in the balance sheet in respect of defined benefit superannuation plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets, adjusted for any unrecognised past service costs. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high quality corporate or government bonds that are denominated in the currency in which the benefits will be paid, and that have a term to maturity approximating the term of the related superannuation liability. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised directly in the statement of recognised income and expense. Past service costs are recognised immediately in the income statement, unless the changes to the superannuation plan are conditional on the employees remaining in service for a specified period of time (the vesting period) in which case the past service costs are amortised on a straight line basis over the vesting period.

(ii) Share based payments

The consolidated entity operates an equity settled, share based compensation plan. No expense is recognised for options and conditional rights granted before 7 November 2002 and/or vested before 1 January 2005. For all other options and conditional rights, the fair value of the employee services received in exchange for the grant of those instruments is recognised as an expense. The total amount to be expensed over the vesting period is determined by reference to the fair value of the instruments granted, excluding the impact of any non-market vesting conditions. The fair value at grant date of the options and conditional rights is calculated using a binomial model. The fair value of each instrument is expensed evenly over the period between grant and vesting dates. Non-market vesting conditions are included in assumptions about the number of instruments that are expected to become exercisable.

At each balance sheet date, the consolidated entity revises its estimates of the number of options that are expected to become exercisable. The consolidated entity recognises the impact of the revision of original estimates, if any, in the income statement with a corresponding adjustment to equity.

(iii) Profit sharing and bonus plans

The consolidated entity recognises a liability and an expense for bonuses and profit sharing based on a formula that takes into consideration the profit attributable to the company's shareholders.

(iv) Termination benefits

Termination benefits are payable when employment is terminated before the normal retirement date or when an employee accepts voluntary redundancy in exchange for these benefits. The consolidated entity recognises termination benefits when it has demonstrably committed to either:

- terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal; or
- providing termination benefits as a result of an offer made to encourage voluntary redundancy.

(v) Long service leave

The provision for long service leave is measured as the present value of expected future payments to be made in respect of services provided by employees up to the reporting date using the projected unit credit method. Benefits due more than 12 months after the balance sheet date are discounted to present value.

(AC) Treasury shares held in trust

The assets, liabilities and results of share based remuneration trusts are included in the balance sheet and results of the consolidated entity. These trusts may hold shares in the company to satisfy the company's obligations under the Employee Share and Option Plan ("the Plan"). Any shares in the company held by a trust are measured at cost (including any attributable acquisition costs). No gain or loss is recognised in the income statement on the sale, cancellation or reissue of these shares. On consolidation, these shares are presented on the balance sheet as treasury shares held in trust and represent a reduction in equity.

(AD) Leases

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight line basis over the period of the lease.

(AE) Rounding of amounts

The company is of a kind referred to in the ASIC class order 98/0100 dated 10 July 1998 (as amended by class order 04/667 dated 15 July 2004) relating to the "rounding off" of amounts in the financial statements. Amounts have been rounded off in the financial statements to the nearest million dollars or, in certain cases, to the nearest thousand dollars in accordance with that class order.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

2 AUSTRALIAN ACCOUNTING STANDARDS, INTERPRETATIONS AND AMENDMENTS ISSUED BUT NOT YET EFFECTIVE

TITLE	OPERATIVE DATE
2007-6 Amendments to Australian Accounting Standards arising from AASB 123 [AASB 1, AASB 101, AASB 107, AASB 111, AASB 116 & AASB 138 and Interpretations 1 & 12]	1 January 2009
2007-8 Amendments to Australian Accounting Standards arising from AASB 101	1 January 2009
2007-9 Amendments to Australian Accounting Standards arising from the Review of AASs 27, 29 and 31 [AASB 3, AASB 5, AASB 8, AASB 101, AASB 114, AASB 116, AASB 127 & AASB 137]	1 January 2009
2007-10 Further Amendments to Australian Accounting Standards arising from AASB 101	1 January 2009
2008-1 Amendments to Australian Accounting Standard – Share-based Payments: Vesting Conditions and Cancellations [AASB 2]	1 January 2009
2008-2 Amendments to Australian Accounting Standards – Puttable Financial Instruments and Obligations arising on Liquidation [AASB 7, AASB 101, AASB 132, AASB 139 & Interpretation 2]	1 January 2009
2008-3 Amendments to Australian Accounting Standards arising from AASB 3 and AASB 127 [AASBs 1, 2, 4, 5, 7, 101, 107, 112, 114, 116, 121, 128, 131, 132, 133, 134, 136, 137, 138 & 139 and Interpretations 9 & 107]	1 January 2009
2008-5 Amendments to Australian Accounting Standards arising from the Annual Improvements Project [AASB 5, 7, 101, 102, 107, 108, 110, 116, 118, 119, 120, 123, 127, 128, 129, 131, 132, 134, 136, 138, 139, 140, 141, 1023 & 1038]	1 January 2009
2008-6 Further Amendments to Australian Accounting Standards arising from the Annual Improvements Project [AASB 1 & AASB 5]	1 January 2010
2008-7 Amendments to Australian Accounting Standards – Cost of an Investment in a Subsidiary, Jointly Controlled Entity or Associate [AASB 1, AASB 118, AASB 121, AASB 127 & AASB 136]	1 January 2009
2008-8 Amendments to Australian Accounting Standards – Eligible Hedged Items [AASB 139]	1 January 2010
2008-9 Amendments to AASB 1049 for Consistency with AASB 101	1 January 2009
Interpretation 17 Distributions of Non-cash Assets to Owners	1 January 2010
2008-13 Amendments to Australian Accounting Standards arising from AASB Interpretation 17 – Distributions of Non-cash Assets to Owners [AASB 5 & AASB 110]	1 January 2010
AASB 3 Revision to Australian Accounting Standard – Business Combinations [AASB 3]	1 January 2010

The Australian accounting standards, interpretations and amendments detailed in the table above are not mandatory for the company or the consolidated entity until the operative dates stated; however, early adoption is permitted.

The consolidated entity and the company will apply the amendments detailed above for the reporting periods beginning on the operative dates set out above. The application of these standards is not expected to have a material impact on either the consolidated entity's or the company's financial statements.

3 CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The consolidated entity is an international general insurance and reinsurance group underwriting most major commercial and personal lines classes of business through operations in 45 countries. The class of business mix and an analysis of the consolidated entity's gross written and net earned premium from insurance and reinsurance business is shown on page 13. The head office function is located in Australia and exists to support the activities of divisional operations as follows:

- Australian operations, which writes general insurance throughout Australia providing all major lines of insurance for commercial and personal risks;
- Asia Pacific operations, which comprises general insurance operations in 15 countries;
- European operations, which comprises general insurance business written in the UK and throughout mainland Europe; both general insurance and reinsurance business written through Lloyd's of London; and reinsurance business written in Ireland; and
- QBE the Americas, which comprises general insurance and reinsurance operations in the US and a number of Latin American countries.

In view of this geographic and product diversity, the consolidated entity has developed a strong, centralised risk management and policy framework designed to ensure consistency of approach across a number of operational activities, subject to the specific requirements of local markets, legislation and regulation. Such operational activities include underwriting, claims management, actuarial assessment of the claims provision and investment management. In addition, assessment of the risk margin undertaken at a divisional level is subject to detailed head office review and the consolidated entity's probability of adequacy is determined by the Group's chief actuarial officer.

Given the centralised approach to many of its activities and the product and geographic diversification, sensitivity analyses in respect of critical accounting estimates and judgments are presented at the consolidated entity level in order to provide a level of analysis which is meaningful, relevant, reliable and comparable year on year. It is considered that disclosure at business segment or product level would not provide a meaningful overview given the complex interrelationships between the variables underpinning the consolidated entity's operations.

The consolidated entity makes estimates and judgments in respect of the reported amounts of certain assets and liabilities. These estimates and judgments are determined by qualified and experienced employees with reference to historical data and reasoned expectations of future events, and are continually updated. The key areas in which critical estimates and judgments are applied are described as follows.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

3

CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS CONTINUED

(A) Ultimate liability arising from claims made under insurance contracts

Provision is made for the estimated cost of claims incurred but not settled at the balance sheet date. This provision consists of estimates of both the expected ultimate cost of claims notified to the consolidated entity as well as the expected ultimate cost of claims incurred but not reported to the consolidated entity ("IBNR"). The estimated cost of claims includes direct expenses that are expected to be incurred in settling those claims.

The estimation of IBNR is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already notified to the consolidated entity, where more information about the claims is generally available. Liability and other long tail classes of business, where claims settlement may not happen for many years after the event giving rise to the claim, typically display greater variability between initial estimates and final settlement due to delays in reporting claims, uncertainty in respect of court awards and future claims inflation. Claims in respect of property and other short tail classes are typically reported and settled sooner after the claim event, giving rise to more certainty. The estimation techniques and assumptions used in determining the outstanding claims provision and the associated reinsurance and other recoveries are described below.

(i) Insurance risk assumptions

The consolidated entity's process for establishing the outstanding claims provision involves extensive consultation with internal and external actuaries, claims managers, underwriters and other senior management. This process includes quarterly internal claims review meetings attended by senior divisional and Group management and detailed review by external actuaries at least annually. The risk management procedures related to the actuarial function are explained further in note 4.

The determination of the amounts that the consolidated entity will ultimately pay for claims arising under insurance and reinsurance contracts involves a number of critical assumptions. Some of the uncertainties impacting these assumptions are as follows:

- changes in patterns of claims incidence, reporting and payment;
- volatility in the estimation of future costs for long tail insurance classes due to the longer period of time that elapses before a definitive determination of the ultimate claims cost can be made;
- incidence of catastrophic events close to the balance sheet date;
- changes in the legal environment, including the interpretation of liability laws and the quantum of damages; and
- social and economic trends, for example price and wage inflation and interest rates.

The potential impact of changes in key assumptions on the consolidated entity's income statement and balance sheet are summarised in note 3(A)(vii).

(ii) Central estimates

The outstanding claims provision comprises the central estimate and a risk margin which is added to the central estimate to achieve a desired probability of adequacy. The outstanding claims provision is discounted at risk-free rates of return to reflect the time value of money.

A central estimate is an estimate of the level of claims provision that is intended to contain no intentional under or over estimation. As the consolidated entity requires a higher probability that estimates will be adequate over time, a risk margin is added to the central estimate of outstanding claims.

Central estimates for each class of business are determined by reference to a variety of estimation techniques, generally based on a statistical analysis of historical experience which assumes an underlying pattern of claims development and payment. The final selected central estimates are based on a judgmental consideration of the results of each method and qualitative information, for example, the class of business, the maturity of the portfolio and the expected term to settlement of the class. Projections are based on both historical experience and external benchmarks where relevant.

Central estimates are calculated gross of any reinsurance recoveries. A separate estimate is made of the amounts recoverable from reinsurers based on the gross outstanding claims provision.

(iii) Risk margin

The determination of the appropriate level of risk margin takes into account the uncertainty or variability of each class of business and the diversification benefits achieved by writing a number of classes of business in a number of geographic locations.

The measurement of variability by class of business uses techniques similar to those used in determining the central estimate. These techniques determine a range of possible outcomes of ultimate payments and assign a likelihood to outcomes at different levels. The use of a range of outcomes allows a determination of the risk margin required to provide an estimate at a given probability of adequacy, e.g. nine times in 10 (a 90% probability of adequacy). These techniques use standard statistical distributions, and the measure of variability is referred to as the standard deviation or the coefficient of variation.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

3 CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS CONTINUED

The risk margin required to provide a given probability of adequacy for two or more classes of business or for two or more geographic locations combined is likely to be less than the sum of the risk margins for the individual classes. This reflects the benefit of diversification in general insurance. The statistical measure used to determine diversification is called the correlation. The higher the correlation between two classes of business, the more likely it is that a negative outcome in one class will correspond to a negative outcome in the other class. For example, high correlation exists in classes of business affected by court cases involving bodily injury claims such as motor third party liability (CTP), workers' compensation and public liability.

Whilst there are estimation techniques for determining correlations, they are difficult to apply. The correlations adopted by the consolidated entity are normally derived from industry analysis, the consolidated entity's historical experience and the judgment of experienced and qualified actuaries.

The risk margin for the consolidated entity is determined by analysing the variability of each class of business and the correlation between classes of business and divisions. Correlations are determined for aggregations of classes of business, where appropriate, at the divisional level. Applying correlations between divisions results in a further diversification benefit to the consolidated entity with a consequent impact on the consolidated entity's risk margin.

The potential impact of changes in the coefficient of variation assumptions on the consolidated entity's income statement and balance sheet is summarised in note 3(A)(vii).

(iv) Assets arising from contracts with reinsurers

Assets arising from contracts with the consolidated entity's reinsurers are determined using the same methods described above. In addition, the recoverability of these assets is assessed at each balance sheet date to ensure that the balances properly reflect the amounts that will ultimately be received, taking into account counterparty and credit risk. Counterparty and credit risk in relation to reinsurance assets are considered in note 4.

(v) Expected present value of future cash flows for future claims

The expected present value of future cash flows for future claims and risk margin used in the liability adequacy test (refer note 21(D)) are determined using the same methods described above.

(vi) Financial assumptions used to determine the outstanding claims provisions

The outstanding claims provision is discounted to net present value using a risk-free rate of return. Details of risk-free rates used to discount the outstanding claims provision are summarised below.

	2008 %		2007 %	
	SUCCEEDING YEAR	SUBSEQUENT YEARS	SUCCEEDING YEAR	SUBSEQUENT YEARS
Australia	2.80 – 3.30	2.75 – 4.15	6.85 – 7.20	6.25 – 7.00
Asia Pacific	0.27 – 11.22	0.27 – 11.22	2.40 – 7.87	2.40 – 7.87
European operations	1.50 – 2.40	1.50 – 2.40	3.40 – 4.60	3.40 – 4.60
the Americas	1.50	1.50	3.40	3.40
Equator Re	1.50 – 3.60	1.50 – 3.60	3.40 – 6.66	3.40 – 6.66

The potential impact of a change in discount rates on the consolidated entity's income statement and balance sheet is summarised in note 3(A)(vii).

The expected maturity of the consolidated entity's discounted net outstanding claims provision is analysed below.

		1 YEAR OR LESS	1 TO 2 YEARS	2 TO 3 YEARS	3 TO 4 YEARS	4 TO 5 YEARS	OVER 5 YEARS	TOTAL
At 31 December 2008	\$M	5,527	3,480	2,239	1,567	1,029	2,319	16,161
At 31 December 2007	\$M	4,640	2,828	1,983	1,339	905	2,176	13,871

The weighted average term to settlement of the consolidated entity's net outstanding claims provision at the balance sheet date is 2.7 years (2007 2.8 years).

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

3 CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS CONTINUED

(vii) Impact of changes in key variables on the outstanding claims provision

The impact of changes in key outstanding claims variables is summarised in the table below. Each change has been calculated in isolation from the other changes and each change shows the after tax impact on profit and equity assuming that there is no change to:

- Any of the other variables – This is considered unlikely as, for example, an increase in interest rates is normally accompanied by an increase in the rate of inflation. As can be seen from the table below, the impact of a change in discount rates is largely offset by the impact of a change in the rate of inflation. The impact on financial assets of a change in interest rates is shown in note 5(A)(ii).
- The probability of adequacy – It is likely that if, for example, the central estimate was to increase by 5%, at least part of the increase would result in a decrease in the probability of adequacy, which is currently estimated to be 86.1%. Likewise, if the coefficient of variation were to increase by 1%, it is likely that the probability of adequacy would reduce from its current level and that the change would therefore impact the amount of risk margins held rather than net profit after income tax or equity.

	MOVEMENT IN VARIABLE %	FINANCIAL IMPACT ⁽¹⁾			
		PROFIT (LOSS) 2008 \$M	EQUITY 2008 \$M	PROFIT (LOSS) 2007 \$M	EQUITY 2007 \$M
Central estimate	+5	(524)	(524)	(430)	(430)
	-5	524	524	430	430
Inflation rate	+1	(283)	(283)	(248)	(248)
	-1	268	268	236	236
Discount rate	+1	265	265	251	251
	-1	(284)	(284)	(270)	(270)
Coefficient of variation	+1	(115)	(115)	(148)	(148)
	-1	113	113	137	137
Weighted average term to settlement	+10	68	68	123	123
	-10	(68)	(68)	(125)	(125)

(1) Determined at the consolidated entity level net of reinsurance and taxation at the prima facie rate of 30%.

AASB 1023: General Insurance Contracts requires that the outstanding claims provision shall be discounted for the time value of money using risk-free rates that are based on current observable, objective rates that relate to the nature, structure and terms of the future obligations. The standard also states that government bond rates may be an appropriate starting point in determining a risk-free rate.

The consolidated entity has adopted government bond rates appropriate to the mean term and currency of the outstanding claims provision. This has resulted in a probability of adequacy of 86.1%. If the consolidated entity had applied swap rates appropriate to the mean term and currency of the outstanding claims provision, the probability of adequacy would have been 89.4%.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

3 CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS CONTINUED

(B) Retirement benefit obligations

The present value of the obligations arising from the consolidated entity's defined benefit superannuation plans is determined by external actuaries based on discount rate, inflation rate, mortality rate, salary growth and investment return assumptions.

The discount rate applied to the various plans is the interest rate on high quality corporate bonds where there is a sufficiently deep market or the appropriate government bond rate.

Mortality assumptions are affected by experience which indicates increasing longevity, particularly for certain age groups of the population. The consolidated entity has considered the consensus of professional opinions from a number of external actuaries in respect of the appropriateness of the mortality tables selected for use in the valuation of the superannuation obligations for each of the consolidated entity's plans.

The potential impact of a change in the most sensitive assumptions on the consolidated entity's income statement and balance sheet is summarised below.

	MOVEMENT IN VARIABLE %	FINANCIAL IMPACT ⁽¹⁾			
		PROFIT (LOSS) 2008 \$M	EQUITY 2008 \$M	PROFIT (LOSS) 2007 \$M	EQUITY 2007 \$M
Discount rate	+1	-	115	-	24
	-1	-	(142)	-	(83)
Inflation rate	+1	-	(81)	-	(46)
	-1	-	68	-	8

(1) Determined at the consolidated entity level net of taxation at the prima facie rate relevant to the superannuation plan.

(C) Intangible assets

Goodwill and intangible assets with an indefinite useful life are tested annually for impairment or more frequently when changes in circumstances indicate that the carrying amount may not be recoverable. Intangible assets subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable. The impairment review is based on the net present value of estimated future cash flows of the relevant cash generating unit which is determined by reference to, amongst other factors, the estimated combined operating ratio in the business plan.

If the discount rate applied in these calculations was increased by 1% over the rates applied at 31 December 2008, the consolidated entity would have no requirement to reflect an impairment.

4 RISK MANAGEMENT

An overview of the consolidated entity's risk management framework is provided in the risk management statement on pages 16 to 18 and in the risk management section of the corporate governance statement on pages 45 to 46.

The consolidated entity's risk management policy, strategy and framework are embedded in the Group head office and in each of the divisional operations, ensuring a consistent approach to managing risk across the organisation. The board annually approves a comprehensive risk management strategy ("RMS") and a reinsurance management strategy ("REMS"), both of which are lodged with the Australian Prudential Regulation Authority ("APRA").

The consolidated entity's risk management objectives are to:

- adequately price risk;
- avoid unwelcome surprises by reducing uncertainty and volatility;
- achieve competitive advantage through better understanding the risk environment in which the consolidated entity operates;
- optimise risk and more effectively allocate capital and resources by assessing the balance of risk and reward;
- comply with laws and internal procedures; and
- improve resilience to external events.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

4 RISK MANAGEMENT CONTINUED

A fundamental part of the consolidated entity's overall risk management strategy is the effective governance and management of the risks that impact the amount, timing and uncertainty of cash flows from insurance contracts. The Group has established internal controls to manage risk in the key areas of exposure relevant to its business. The broad risk categories discussed below are:

- insurance risk;
- reinsurance counterparty risk;
- acquisition risk;
- operational risk; and
- capital and regulatory risk.

Financial risks are considered in note 5. Within each of these categories, risks are evaluated before consideration of the impact of mitigating controls. The existence and effectiveness of such mitigating controls are then measured to ensure that residual risks are managed within risk tolerance.

(A) Insurance risk

The risks inherent in any single insurance contract are the possibility of the insured event occurring and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, these risks are random and unpredictable. In relation to the pricing of individual insurance contracts and the determination of the level of the outstanding claims provision in relation to a portfolio of insurance contracts, the principal risk is that the ultimate claims payments will exceed the carrying amount of the provision established.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller the relative variability around the expected outcome will be. In addition, a more diversified insurance and reinsurance group is less likely to be affected by a change in any one specific portfolio. The consolidated entity has developed its underwriting strategy to diversify the type of insurance risks accepted and, within each of these categories, to achieve a sufficiently large population of risks to reduce the variability of the expected outcome.

The consolidated entity has established the following protocols to manage its insurance risk across the underwriting, claims and actuarial disciplines.

(i) Underwriting risks

Selection and pricing of risks

Underwriting authority is delegated to experienced underwriters for the forthcoming year following a detailed retrospective and prospective analysis of each class of business as part of the consolidated entity's annual business planning process. Delegated authorities reflect the level of risk which the consolidated entity is prepared to take. The authorities include reference to some combination of:

- gross written premium;
- premium per contract;
- sum insured per contract;
- aggregate exposures per zone;
- probable maximum loss and realistic disaster scenarios ("RDSs");
- levels and quality of reinsurance protection;
- geographic exposures; and/or
- classes of business and types of product that may be written.

Limits in respect of each of the above are set at a portfolio, divisional and consolidated entity level and are included within business plans for individual classes of business. They are adjusted at a local level to reflect a risk factor in respect of each controlled entity depending on previous underwriting results, the economic environment and other potential drivers of volatility.

Insurance and reinsurance policies are written in accordance with local management practices and regulations within each jurisdiction taking into account the consolidated entity's risk tolerance and underwriting standards. Non-standard and long-term policies may only be written if expressly included in the delegated authorities. No individual long-term or non-standard policy is material to the consolidated entity.

Pricing of risks is controlled by the use of in-house pricing models relevant to specific portfolios and the markets in which the consolidated entity operates. Experienced underwriters and actuaries maintain historical pricing and claims analysis for each portfolio and this is combined with a detailed knowledge of the current developments in the respective markets and classes of business.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

4 RISK MANAGEMENT CONTINUED

Concentration risk

The consolidated entity's exposure to concentrations of insurance risk is mitigated by a portfolio diversified across 45 countries and hundreds of classes of business. Product diversification is achieved through a strategy of developing strong underwriting skills in a wide variety of classes of business. A combination of core and speciality products under the control of employees skilled in underwriting such products allows the consolidated entity to lead underwrite in many of the markets in which it operates.

The table below demonstrates the diversity of the consolidated entity's operations.

GROSS EARNED PREMIUM	2008 \$M	2007 \$M
Property	3,515	3,446
Motor and motor casualty	2,518	2,222
Liability	2,154	2,318
Marine, energy and aviation	1,285	1,221
Workers' compensation	1,186	1,196
Professional indemnity	885	900
Accident and health	490	460
Other	321	170
Financial and credit	276	243
Bloodstock	223	185
	12,853	12,361

The consolidated entity has potential exposure to catastrophe losses that may impact more than one operating division. Each year, the consolidated entity sets its tolerance to concentration risk. RDSs, using industry standard and QBE determined probable maximum losses and various catastrophe models, are calculated for each portfolio as part of the business planning process. These RDSs are aggregated across all portfolios and divisions to determine the consolidated entity's maximum event retention ("MER") which is the estimated maximum net loss from a major natural catastrophe with an approximate return period of 250 years. The MER must be less than the consolidated entity's concentration risk tolerance, otherwise steps such as the purchase of additional reinsurance are taken to limit the exposure.

In 2008, the net cost to the consolidated entity of weather-related catastrophic events above \$2.5 million was \$424 million before income tax (2007 \$317 million before income tax).

(ii) Claims management and claims provisioning risks

The consolidated entity's approach to determining the outstanding claims provision and the related sensitivities are set out in note 3. The consolidated entity seeks to ensure the adequacy of its outstanding claims provision by reference to the following controls:

- experienced claims managers work with underwriters on coverage issues and operate within the levels of authority delegated to them in respect of the settlement of claims;
- processes exist to ensure that all claims advices are captured and updated on a timely basis and with a realistic assessment of the ultimate claims cost;
- initial IBNR estimates are set by experienced internal actuaries in conjunction with the local product managers and underwriters for each class of business in each business unit;
- the aggregate outstanding claims provision for each controlled entity is assessed in a series of quarterly internal claims review meetings, which are attended by senior divisional management and one or both of the Group chief risk officer and Group chief actuarial officer in order to ensure consistency of provisioning practices across all divisions; and
- approximately 90% of the consolidated entity's outstanding claims provision is reviewed by external actuaries at least annually.

Despite the rigour involved in the establishment and review of the outstanding claims provision, the provision is subject to significant uncertainty for the reasons set out in note 3.

(B) Reinsurance counterparty risk

The consolidated entity reinsures a portion of risks underwritten to control exposure to insurance losses, reduce volatility and protect capital. The consolidated entity's strategy in respect of the selection, approval and monitoring of reinsurance arrangements is addressed by the following protocols:

- treaty or facultative reinsurance is placed in accordance with the requirements of the consolidated entity's reinsurance management strategy and Group security committee guidelines;
- reinsurance arrangements are regularly reassessed to determine their effectiveness based on current exposures, historical losses and potential future losses based on RDSs and the consolidated entity's MER; and
- exposure to reinsurance counterparties and the credit quality of those counterparties is actively monitored.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

4 RISK MANAGEMENT CONTINUED

Strict controls are maintained over reinsurance counterparty exposures. Reinsurance is placed with counterparties that have a strong credit rating and concentration of risk is managed by adherence to counterparty limits. Counterparty limits are reviewed by management on a regular basis. Credit risk exposures are calculated regularly and compared with authorised credit limits. In certain cases, the consolidated entity requires letters of credit or other collateral arrangements to be provided to guarantee the recoverability of the amount involved. In some cases, further security has been obtained in the form of trust arrangements, reinsurer default protection and other potential offsets. This additional security has not been included in the credit rating analysis set out below.

The following table provides information about the quality of the consolidated entity's credit risk exposure in respect of reinsurance and other recoveries on outstanding claims at the balance sheet date. The analysis classifies the assets according to Standard & Poor's counterparty credit ratings. AAA is the highest possible rating. Rated assets falling outside the range of AAA to BBB are classified as speculative grade.

		CREDIT RATING						TOTAL \$M
		AAA \$M	AA \$M	A \$M	BBB \$M	SPECULATIVE GRADE \$M	NOT RATED \$M	
Reinsurance and other recoveries on outstanding claims	2008	231	2,739	1,756	35	113	169	5,043
	2007	146	2,527	1,378	55	89	165	4,360
Reinsurance and other recoveries on paid claims	2008	15	164	130	6	16	44	375
	2007	15	177	145	8	38	23	406

The following table provides further information regarding the ageing of reinsurance and other recoveries on paid claims at the balance sheet date.

		NEITHER PAST DUE NOR IMPAIRED \$M	PAST DUE BUT NOT IMPAIRED				TOTAL \$M
			0 TO 3 MTHS \$M	3 TO 6 MTHS \$M	6 MTHS TO 1 YEAR \$M	GREATER THAN 1 YEAR \$M	
Reinsurance and other recoveries on paid claims	2008	72	164	52	24	63	375
	2007	122	210	1	33	40	406

(C) Acquisition risk

The consolidated entity's strategy of growth by acquisition exposes it to additional risks. Acquisition risks are principally managed by the consolidated entity's controls over the selection of potential acquisitions, due diligence, negotiation of warranties and indemnities and subsequent integration processes. The consolidated entity has experienced due diligence teams in each of the divisions and has documented minimum requirements for carrying out due diligence.

(D) Operational risk

Operational risk is the risk of loss arising from system failure or inadequacies, human error or external events that does not relate to insurance, acquisition, capital and regulatory or financial risks. The consolidated entity manages operational risk within the same robust control framework as its other risks. One of the cornerstones of the consolidated entity's risk management framework is the recruitment and retention of high quality people who are entrusted with appropriate levels of autonomy within the parameters of disciplined risk management practices. The consolidated entity operates a system of delegated authorities based on expertise and proven performance, and compliance is closely monitored. Other controls include effective segregation of duties, access controls and authorisation and reconciliation procedures.

(E) Capital and regulatory risk

Australian and overseas controlled entities are subject to extensive prudential and other forms of regulation in the jurisdictions in which they conduct business. Prudential regulation is generally designed to protect policyholders. Regulation covers a number of areas including solvency, change in control and capital movement limitations. The regulatory environment in Australia and overseas continues to evolve in response to economic, political and industry developments. The consolidated entity works closely with regulators and monitors regulatory developments across its global operations to assess their potential impact on its ability to meet solvency and other requirements. Refer to note 25(H).

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

5 FINANCIAL RISK

The operating activities of the consolidated entity expose it to financial risks such as market risk, credit risk and liquidity risk. The consolidated entity's risk management framework recognises the unpredictability of financial markets and seeks to minimise potential adverse effects on its financial performance. The key objective of the consolidated entity's asset and liability management strategy is to ensure sufficient liquidity is maintained at all times to meet the consolidated entity's obligations, including its settlement of insurance liabilities and, within these parameters, to optimise investment returns for policyholders and shareholders.

(A) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market factors. Market risk comprises three types of risk: currency risk (due to fluctuations in foreign exchange rates), interest rate risk (due to fluctuations in market interest rates) and price risk (due to fluctuations in market prices).

(i) Currency risk

The consolidated entity is exposed to currency risk in respect of its net foreign currency exposures. This risk is managed as follows:

- each controlled entity manages the volatility arising from changes in foreign exchange rates by matching liabilities with assets of the same currency, thus ensuring that any exposures to other currencies are minimised;
- where possible, forward foreign exchange contracts are used to protect residual currency positions. These forward foreign exchange contracts are accounted for in accordance with the derivatives accounting policy set out in note 1(O); and
- the consolidated entity manages the currency risk arising from the translation of net investments in foreign operations to Australian dollars using either foreign currency borrowings designated as hedging instruments or forward foreign exchange contracts designated as hedging instruments.

Those arrangements which meet the hedging criteria set out in AASB 139 are accounted for in accordance with the accounting policy set out in note 1(P). The effectiveness of the currency management processes and the related use of derivatives is actively monitored by the Group chief financial officer.

The risk management process covering forward foreign exchange contracts and hedges involves close senior management scrutiny, including regular board and other management reporting. All forward foreign exchange contracts and hedge transactions are subject to delegated authority levels provided to management, and the levels of exposure are reviewed on an ongoing basis.

All instruments that are designated as hedges are tested for effectiveness on both a prospective and a retrospective basis. These tests are performed at least quarterly.

The consolidated entity's policy is to actively manage, where possible, both its operational foreign currency exposures at a controlled entity level and its exposures arising on the translation of net investments in foreign operations at a consolidated entity level. Residual foreign currency exposures at the controlled entity level are managed to be within an absolute local currency unit limit. Residual foreign currency exposures arising at a consolidated entity level on translation of net investments in foreign operations are managed so that they do not exceed 5% of shareholders' funds.

The analysis below demonstrates the impact on profit after income tax and equity of a movement in foreign currency exchange rates against the Australian dollar on our major operational currency exposures using the residual controlled entity foreign currency exposures at the balance sheet date.

	RESIDUAL EXPOSURE AT 31 DEC 2008 \$M	MOVEMENT IN VARIABLE AGAINST A\$ %	FINANCIAL IMPACT ⁽¹⁾		RESIDUAL EXPOSURE AT 31 DEC 2007 \$M	MOVEMENT IN VARIABLE AGAINST A\$ %	FINANCIAL IMPACT ⁽¹⁾	
			PROFIT (LOSS) 2008 \$M	EQUITY 2008 \$M			PROFIT (LOSS) 2007 \$M	EQUITY 2007 \$M
US dollar	65	+10	5	5	89	+5	3	3
		-10	(5)	(5)		-5	(3)	(3)
Sterling	48	+10	3	3	11	+5	-	-
		-10	(3)	(3)		-5	-	-
Euro	168	+10	12	12	92	+5	3	3
		-10	(12)	(12)		-5	(3)	(3)

(1) Determined at the consolidated entity level net of taxation at the prima facie rate of 30%.

Applying the same sensitivity analysis to the company's residual foreign currency exposures at the balance sheet date, the financial impact of a 10% strengthening of sterling against the Australian dollar would increase profit after income tax and equity by \$3 million (2007 \$nil) and a 10% weakening of sterling against the Australian dollar would reduce profit after income tax and equity by \$3 million (2007 \$nil).

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

5 FINANCIAL RISK CONTINUED

The analysis below demonstrates the impact on profit after income tax and equity of a movement in foreign currency exchange rates on our major currency exposures arising on the translation of net investments in foreign operations to Australian dollars using the consolidated entity's actual residual exposure at the balance sheet date.

	RESIDUAL EXPOSURE AT 31 DEC 2008 \$M	MOVEMENT IN VARIABLE AGAINST A\$ %	FINANCIAL IMPACT ⁽¹⁾		RESIDUAL EXPOSURE AT 31 DEC 2007 \$M	MOVEMENT IN VARIABLE AGAINST A\$ %	FINANCIAL IMPACT ⁽¹⁾	
			PROFIT (LOSS) 2008 \$M	EQUITY 2008 \$M			PROFIT (LOSS) 2007 \$M	EQUITY 2007 \$M
US dollar	60	+10	–	6	(61)	+5	–	(3)
		–10	–	(6)		–5	–	3
Sterling	38	+10	–	4	91	+5	–	5
		–10	–	(4)		–5	–	(5)

(1) Determined at the consolidated entity level.

(ii) Interest rate risk

Financial instruments with floating rate interest expose the consolidated entity to cash flow interest rate risk, whereas fixed interest rate instruments expose the consolidated entity to fair value interest rate risk.

The consolidated entity's risk management approach is to minimise interest rate risk by actively managing investment portfolios to achieve a balance between cash flow interest rate risk and fair value interest rate risk. The consolidated entity invests in high quality, liquid fixed interest securities and cash and actively manages the duration of the fixed interest portfolio.

Interest-bearing borrowings are valued at amortised cost and therefore do not expose the consolidated entity to fair value interest rate risk. In addition, the majority of these interest-bearing borrowings are at fixed interest rates and so do not expose the entity to cash flow interest rate risk; however, Eurobonds and ABC securities for funds at Lloyd's issued at variable interest rates are subject to cash flow interest rate risk. The consolidated entity manages this interest rate risk and other financial risk associated with the Eurobonds and ABC securities for funds at Lloyd's by using derivative financial instruments. For further details refer to notes 12(A)(iii) and 34 respectively.

The contractual maturity profile of the consolidated entity's interest-bearing financial assets and hence its exposure to interest rate risk, and the effective weighted average interest rate for interest-bearing financial assets (excluding ABC financial assets pledged for funds at Lloyd's) is analysed below. The table includes investments at the maturity date of the security; however, many of the longer-dated securities have call dates of relatively short duration. The maturity of ABC financial assets pledged for funds at Lloyd's is shown in note 34(D).

		FLOATING INTEREST RATE ⁽¹⁾	FIXED INTEREST RATE MATURING IN						TOTAL
			1 YEAR OR LESS ⁽²⁾	1 TO 2 YEARS	2 TO 3 YEARS	3 TO 4 YEARS	4 TO 5 YEARS	OVER 5 YEARS ⁽³⁾	
At 31 December 2008									
Interest-bearing financial assets	\$M	5,820	18,011	1,087	899	618	56	349	26,840
Weighted average interest rate	%	4.7	2.5	3.7	5.3	2.5	5.5	6.9	3.2
At 31 December 2007									
Interest-bearing financial assets	\$M	2,837	18,068	840	481	46	93	492	22,857
Weighted average interest rate	%	5.0	5.2	6.5	6.5	6.7	5.1	6.7	5.3

(1) Includes \$641 million (2007 \$11 million) of cash and cash equivalents and \$nil (2007 \$1 million) of short-term money relating to the company.

(2) Includes \$52 million (2007 \$45 million) of short-term money relating to the company.

(3) Interest-bearing investments in the company of \$718 million (2007 \$nil) have a maturity of greater than five years. These were eliminated on consolidation.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

5 FINANCIAL RISK CONTINUED

The consolidated entity's sensitivity to movements in interest rates in relation to the value of interest-bearing financial assets is shown in the table below.

	MOVEMENT IN VARIABLE %	FINANCIAL IMPACT ⁽¹⁾		MOVEMENT IN VARIABLE %	FINANCIAL IMPACT ⁽¹⁾	
		PROFIT (LOSS) 2008 \$M	EQUITY 2008 \$M		PROFIT (LOSS) 2007 \$M	EQUITY 2007 \$M
Interest rate movement – interest-bearing financial assets	+1.5	(141)	(141)	+1	(48)	(48)
	-1.5	141	141	-1	48	48

(1) Determined at the consolidated entity level net of taxation at the prima facie rate of 30%.

The effect of interest rate movements on the consolidated entity's provision for outstanding claims is included in note 3(A)(vii).

(iii) Price risk

Price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded on the market.

The consolidated entity is exposed to price risk on its investment in equities and uses derivative financial instruments to manage this exposure. The risk management processes over these derivative financial instruments are the same as those explained in note 5(A)(i) in respect of forward foreign exchange contracts. Exposure is also managed by diversification across worldwide markets and currencies.

At 31 December 2008, 5.3% (2007 6.6%) of the consolidated entity's investments and cash was held in listed equities. The majority of the consolidated entity's equities were publicly traded in the major financial markets.

The potential impact of movements in the market value of listed equities on the consolidated entity's income statement and balance sheet is shown in the sensitivity analysis in the table below. The calculation assumes that exposures are unhedged although in practice the consolidated entity may purchase derivatives to manage this exposure. The price risk in relation to unlisted securities is immaterial in terms of the possible impact on profit or loss and has not been included in the sensitivity analysis.

	EXPOSURE AT 31 DEC 2008 \$M	MOVEMENT IN VARIABLE %	FINANCIAL IMPACT ⁽¹⁾		EXPOSURE AT 31 DEC 2007 \$M	MOVEMENT IN VARIABLE %	FINANCIAL IMPACT ⁽¹⁾	
			PROFIT (LOSS) 2008 \$M	EQUITY 2008 \$M			PROFIT (LOSS) 2007 \$M	EQUITY 2007 \$M
ASX 200	566	+20	77	77	831	+5	27	27
		-20	(77)	(77)		-5	(27)	(27)
FTSE 100	265	+20	34	34	399	+5	13	13
		-20	(34)	(34)		-5	(13)	(13)
EURO STOXX	110	+20	15	15	119	+5	4	4
		-20	(15)	(15)		-5	(4)	(4)
S & P 500	543	+20	70	70	260	+5	9	9
		-20	(70)	(70)		-5	(9)	(9)

(1) Determined at the consolidated entity level net of taxation at the prima facie rate of 30%.

(B) Credit risk

Credit risk is the risk that one party to a financial instrument will cause financial loss to the other party by failing to discharge an obligation. The following policies and procedures are in place to mitigate the consolidated entity's exposure to credit risk:

- a Group-wide investment credit risk policy is in place which defines what constitutes credit risk for the consolidated entity. Compliance with the policy is monitored and exposures and breaches are reported to the Group investment committee;
- net exposure limits are set for each counterparty or group of counterparties in relation to investments, cash deposits and forward foreign exchange exposures. The policy also sets out minimum credit ratings for investments that may be held;
- the consolidated entity has strict guidelines covering the limits and terms of net open derivative positions and the counterparties with which the consolidated entity may transact. The consolidated entity does not expect any investment counterparties to fail to meet their obligations given their strong credit ratings and therefore does not require collateral or other security to support derivatives. The consolidated entity only uses derivatives in highly liquid markets; and
- credit risk in respect of premium debtors and reinsurance receivables is actively monitored. Strict controls are maintained over counterparty exposures. Business is transacted with counterparties that have a strong credit rating and concentration of risk is avoided by adherence to counterparty limits. The provision for impairment is formally assessed by management at least four times a year.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

5 FINANCIAL RISK CONTINUED

The following tables provide information regarding the aggregate credit risk exposure of the consolidated entity and the company at the balance sheet date in respect of the major classes of financial assets. The analysis classifies the assets according to Moody's counterparty credit ratings. Aaa is the highest possible rating. Rated assets falling outside the range of Aaa to Baa are classified as speculative grade.

As at 31 December 2008

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

5 FINANCIAL RISK CONTINUED

Details of credit risk in respect of reinsurance recoveries on outstanding claims are set out in note 4(B).

The carrying amount of the relevant asset classes in the balance sheet represents the maximum amount of credit exposure. The fair value of derivatives shown on the balance sheet represents the current risk exposure but not the maximum risk exposure that could arise in the future as a result of changing values. Further details are provided in note 12.

The following tables provide information regarding the ageing of the consolidated entity's and the company's financial assets that are past due but not impaired at the balance sheet date.

As at 31 December 2008

CONSOLIDATED	NEITHER PAST DUE NOR IMPAIRED ⁽¹⁾ \$M	PAST DUE BUT NOT IMPAIRED				TOTAL \$M
		0 TO 3 MTHS \$M	3 TO 6 MTHS \$M	6 MTHS TO 1 YEAR \$M	GREATER THAN 1 YEAR \$M	
Premium receivable	1,705	416	100	27	21	2,269
Other debtors	558	14	1	8	24	605
Treasury receivables	79	–	–	–	–	79
Investment receivables	275	2	2	5	–	284

(1) Includes \$9 million of treasury receivables and \$20 million of investment receivables relating to the company.

As at 31 December 2007

CONSOLIDATED	NEITHER PAST DUE NOR IMPAIRED ⁽¹⁾ \$M	PAST DUE BUT NOT IMPAIRED				TOTAL \$M
		0 TO 3 MTHS \$M	3 TO 6 MTHS \$M	6 MTHS TO 1 YEAR \$M	GREATER THAN 1 YEAR \$M	
Premium receivable	1,304	392	88	13	37	1,834
Other debtors	404	54	5	12	11	486
Treasury receivables	92	–	–	–	–	92
Investment receivables	339	–	–	–	–	339

(1) Includes \$10 million of treasury receivables and \$5 million of investment receivables relating to the company.

The company has amounts due from controlled entities of \$3,063 million (2007 \$1,551 million) which are neither past due nor impaired.

Details of the ageing of reinsurance and other recoveries on paid claims are set out in note 4(B).

(C) Liquidity risk

In addition to treasury cash held for working capital requirements, and in accordance with the consolidated entity's liquidity policy, a minimum percentage of consolidated investments and cash is held in liquid, short-term money market securities to ensure that there are sufficient liquid funds available to meet insurance and investment obligations. The consolidated entity has a strong liquidity position. At 31 December 2008, the average duration of cash and fixed interest securities was 0.5 years (2007 0.3 years).

The consolidated entity limits the risk of liquidity shortfalls resulting from mismatches in the timing of claims payments and receipts of claims recoveries by negotiating cash call clauses in reinsurance contracts and seeking accelerated settlements for large claims.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

5 FINANCIAL RISK CONTINUED

The tables below summarise the contractual maturity profile of certain financial liabilities of the consolidated entity and the company based on the remaining undiscounted contractual obligations. The maturity profile of borrowings is included in note 24.

As at 31 December 2008

CONSOLIDATED	1 YEAR OR LESS ⁽¹⁾ \$M	1 TO 3 YEARS \$M	3 TO 5 YEARS \$M	OVER 5 YEARS \$M	NO TERM \$M	TOTAL \$M
Trade payables	856	54	2	1	9	922
Treasury payables	26	–	–	–	–	26
Investment payables	42	–	–	–	–	42

(1) Includes \$9 million of treasury payables relating to the company.

As at 31 December 2007

CONSOLIDATED	1 YEAR OR LESS ⁽¹⁾ \$M	1 TO 3 YEARS \$M	3 TO 5 YEARS \$M	OVER 5 YEARS \$M	NO TERM \$M	TOTAL \$M
Trade payables	1,107	64	19	16	–	1,206
Treasury payables	64	–	–	–	–	64
Investment payables	37	–	–	–	–	37

(1) Includes \$15 million of treasury payables relating to the company.

The company has amounts due to controlled entities of \$2,528 million (2007 \$1,862 million) which are repayable in one year or less.

The consolidated entity and the company have no significant concentration of liquidity risk.

The maturity profile of the consolidated entity's net outstanding claims provision is analysed in note 3(A)(vi). For the maturity profile of derivative financial instruments refer to note 12. For the maturity profile of ABC securities for funds at Lloyd's and the swaps relating to the ABC securities refer to note 34.

Deferred tax liabilities (credited) charged to income statement	(77)	74	98	405
	(80)	71	53	218

(1) Consolidated deferred tax expense includes \$1 million (2007 \$14 million) credited to the income statement as a result of changes in income tax rates.

(B) Tax consolidation legislation

The accounting policy in relation to this legislation is set out in note 1(J).

On adoption of the tax consolidation legislation, the directors of the company and its Australian entities entered into a tax sharing and tax funding agreement that requires the Australian entities to fully compensate the company for current tax liabilities and to be fully compensated by the company for any current tax or deferred tax assets in respect of tax losses arising from external transactions occurring after the date of implementation of the tax consolidation legislation. The contributions are allocated by reference to the notional taxable income of each Australian entity.

Details of franking credits available to shareholders are shown in note 25(F).

Notes to the Financial Statements

FOR THE YEAR ENDED 31 DECEMBER 2008

9 CLAIMS INCURRED (CONSOLIDATED)

(A) Claims analysis

	2008 \$M	2007 \$M
Gross claims incurred and related expenses

Discount	(372)	1,119	747	(716)	618	(98)
	7,053	(665)	6,388	5,866	(313)	5,553

The development of net undiscounted outstanding claims for the eight most recent accident years is shown in note 22(D).

10 CASH AND CASH EQUIVALENTS

	THE COMPANY		CONSOLIDATED	
	2008 \$M	2007 \$M	2008 \$M	2007 \$M
Cash at bank and on hand	233	6	816	330
Overnight money	408	5	726	183
Cash management trusts	-	-	297	179
Term deposits	-	-	896	293
Commercial paper	-	-	1	3
	641	11	2,736	988

Included in cash and cash equivalents are amounts totalling \$193 million (2007 \$151 million) which are held in Lloyd's syndicate trust funds. Under Lloyd's bye-laws, these amounts can only be used to pay claims and allowable expenses of the syndicate and cannot be withdrawn from the trust funds until distributed as profit.

Amounts in cash and cash equivalents are the same as those included in the cash flow statement.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

11 INVESTMENTS

	THE COMPANY		CONSOLIDATED	
	2008 \$M	2007 \$M	2008 \$M	2007 \$M
Interest-bearing				
Short-term money	52	46	16,885	16,317

	770	46	24,104	21,869
Equities				
Listed	-	-	1,523	1,615
Unlisted	-	-	66	33
Exchange traded equity derivatives	-	-	-	8
	-	-	1,589	1,656
Total investments	770	46	25,693	23,525
Amounts maturing within 12 months	52	46	18,071	19,268
Amounts maturing in greater than 12 months	718	-	7,622	4,257
Total investments	770	46	25,693	23,525

(A) Unlisted equities

The fair value movement in unlisted equities was a gain of \$34 million (2007 \$6 million).

(B) Exchange traded equity derivatives

Contractual amounts for forward contracts at the balance sheet date were \$nil (2007 \$8 million receivable). The credit risk arising from equity derivatives is \$nil (2007 \$8 million). There were no amounts outstanding for purchased or written options (2007 \$nil).

(C) Charges over investments and other assets

A controlled entity has given fixed and floating charges over certain of its investments and other assets in order to secure the obligations of the consolidated entity's corporate members at Lloyd's of London as described in note 31. Details of the fixed and floating charges over ABC financial assets pledged for funds at Lloyd's are provided in note 34.

(D) Valuation of investments

The consolidated entity's accounting policy in relation to the valuation of investments is provided in note 1(N). Where possible, floating rate notes are valued with reference to prices quoted in active markets. In the current market environment, prices are not available for all instruments. For positions where observable transaction data is not available, the consolidated entity estimates the fair value of these instruments with reference to non-binding broker quotes. For valuations undertaken with reference to a model with observable inputs, the key inputs are standard market yield curves such as LIBOR.

A summary of the valuation bases applied by the consolidated entity at the balance sheet date is set out below.

	QUOTED PRICE \$M	CONSENSUS PRICE USING BROKER QUOTES \$M	VALUATION MODEL WITH OBSERVABLE INPUTS \$M	2008 TOTAL \$M
Short-term money	-	-	16,885	16,885
Government bonds	-	1,992	-	1,992
Corporate bonds	-	1,823	-	1,823
Floating rate notes	-	3,245	-	3,245
Fixed interest trusts	159	-	-	159
Equities	1,589	-	-	1,589
Total investments	1,748	7,060	16,885	25,693

Corporate bonds with a value of \$718 million in the company have been valued based on consensus pricing using broker quotes. Short-term money in the company of \$52 million has been valued by use of a valuation model with observable inputs.

(E) Restrictions on use

Included in short-term money are amounts totalling \$3,651 million (2007 \$3,380 million) which are held in Lloyd's syndicate trust funds. Under Lloyd's bye-laws, these amounts can only be used to pay claims and allowable expenses of the syndicate and cannot be withdrawn from the trust funds until distributed as profit.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

12 DERIVATIVE FINANCIAL INSTRUMENTS

(A) Fair value

	THE COMPANY		CONSOLIDATED	
	2008 \$M	2007 \$M	2008 \$M	2007 \$M
Assets maturing within 12 months				
Forward foreign exchange contracts	4	58	762	239
Assets maturing in greater than 12 months				
Forward foreign exchange contracts	–	–	3	1
Eurobond swaps	–	–	102	26
	4	58	867	266
Liabilities maturing within 12 months				
Forward foreign exchange contracts	(209)	(43)	(1,119)	(231)
	(205)	15	(252)	35

Swaps relating to ABC securities are included in note 34 and equity derivatives are included in note 11(B).

All derivative positions entered into by the consolidated entity are for economic hedging purposes but do not, in all cases, meet the criteria for hedge accounting.

(i) Credit risk

Credit risk arises from the potential failure of counterparties to meet their obligations under the respective contracts at maturity. This arises on derivative financial instruments with unrealised gains. In the consolidated entity, \$867 million (2007 \$266 million) is receivable from forward foreign exchange contracts and Eurobond swaps at the balance sheet date.

(ii) Forward foreign exchange contracts

Forward foreign exchange contracts are entered into by the consolidated entity for the purpose of managing residual foreign currency exposures. The consolidated entity's policy for managing such exposures is explained in note 5(A). In the consolidated entity, undiscounted contractual amounts to purchase \$27,483 million (2007 \$20,334 million) were outstanding at the balance sheet date. The maturity profile of these contracts is set out in the table below.

	THE COMPANY		CONSOLIDATED	
	2008 \$M	2007 \$M	2008 \$M	2007 \$M
Less than one year	1,823	5,357	27,471	20,322
More than one year but less than five years	–	–	12	12
	1,823	5,357	27,483	20,334

(iii) Eurobond swaps

A controlled entity is exposed to cash flow interest rate and currency risk in respect of its three Eurobond financing arrangements. Accordingly, the consolidated entity has entered into swap agreements which result in the consolidated entity's Eurobond borrowings being fixed at sterling amounts until 2010, at which point the consolidated entity will be liable for the original Australian dollar and Euro amounts in the underlying financing arrangements. The facility can be extended for a further 10 years to 2020. Under the swap agreements, the variable interest rates of between 1.8% and 2.0% above the wholesale interbank rate are swapped to fixed rates of between 8.4% and 8.6% payable quarterly until 2010. The timing of the payments under the swap agreements matches the dates on which interest is payable on the underlying debt. The contracts are settled on a net basis.

The underlying borrowings are measured at amortised cost in original currency and translated to Australian dollars at the closing rate of exchange. The swaps are measured at fair value. The swaps are designated as cash flow hedges and have satisfied the relevant hedge effectiveness tests throughout the year and at the balance sheet date. The gain or loss on the cash flow hedges is recognised directly in equity. Any ineffectiveness in the cash flow hedges is recognised directly in the income statement. Each financial year end, until the close out of the swap agreements in 2010, an amount is transferred from equity to the income statement to offset:

- the differential between the fixed and variable interest payments; and
- the movement in the spot rate on the borrowings.

During the year, a gain of \$82 million (2007 \$14 million) was recognised in equity relating to the movements in the fair value of the swaps. During the year, a gain of \$70 million (2007 \$33 million) was transferred from equity and included in the income statement.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

12 DERIVATIVE FINANCIAL INSTRUMENTS CONTINUED

(B) Hedging arrangements

The following derivatives have been designated as hedges and meet the relevant requirements of AASB 139:

TYPE OF HEDGE	DESCRIPTION OF INSTRUMENT	NATURE OF RISKS	FAIR VALUE	
			2008 \$M	2007 \$M
Fair value	Interest rate swaps – ABC securities (due 2008)	Changes in fair value of financial liability due to interest rate risk	–	(5)
Cash flow	Cross currency interest rate swaps – Eurobonds	Variability of functional currency cash flows due to interest rate and currency risk	102	26
Cash flow	Cross currency interest rate swaps – ABC securities (due 2009)	Variability of functional currency cash flows due to interest rate and currency risk	67	(25)
Net investments in foreign operations	Forward foreign exchange contracts	Currency risk	258	(47)

At the balance sheet date, no borrowings were designated as hedges of net investments in foreign operations (2007 nil).

13 TRADE AND OTHER RECEIVABLES

	THE COMPANY		CONSOLIDATED	
	2008 \$M	2007 \$M	2008 \$M	2007 \$M
Trade debtors				
Premium receivable	–	–	2,269	1,834
Reinsurance and other recoveries	–	–	375	406
Unclosed premium	–	–	1,429	1,459
	–	–	4,073	3,699

Receivable in greater than 12 months	32	19	69	6
Trade and other receivables	3,092	1,566	5,041	4,616

(A) Provision for impairment (consolidated)

Premium receivable is shown net of a provision for impairment of \$86 million (2007 \$59 million).

Reinsurance and other recoveries are shown net of a provision for impairment of \$74 million (2007 \$87 million).

(B) Fair value

Due to the short-term nature of these receivables, their carrying value is assumed to approximate their fair value.

(C) Risk

The maximum exposure to credit risk at the reporting date is the fair value of each class of receivables. No receivables are pledged by the consolidated entity as collateral for liabilities or contingent liabilities. Information on the ageing and credit rating of balances in the table above, where relevant, is included in note 5. Note 5 also provides more information on the risk management policy of the consolidated entity.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

Principal owner occupied properties are valued annually by the directors effective 31 December based on independent valuations.

All owner occupied properties were valued on the basis of capitalisation of net market rentals allowing for costs of reletting, having regard to comparable on-market sales and discounted future cash flows.

In accordance with the consolidated entity's accounting policy, freehold buildings are measured at fair value. The cost of freehold buildings at 31 December 2008 was \$271 million (2007 \$224 million).

Balance at 31 December	41	27	1,143	740

(B) Tax losses

The consolidated entity has not brought to account \$24 million (2007 \$1 million) of tax losses, which includes the benefit arising from tax losses in overseas countries. This benefit will only be brought to account when the directors believe it is probable that it will be realised. This benefit of tax losses will only be obtained if:

- the consolidated entity derives future assessable income of a nature and an amount sufficient to enable the benefit from the deductions for the losses to be realised;
- the consolidated entity continues to comply with the conditions for deductibility imposed by tax legislation; and
- no changes in tax legislation adversely affect the consolidated entity in realising the benefit from the deductions for the losses.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

ZC Sterling Corporation	US	100.00	–
ZC Sterling Insurance Agency Inc	US	100.00	–

(1) All controlled entities have a 31 December year end.

(2) The following special conditions exist with respect to the consolidated entity's equity holdings:

- For accounting purposes, the consolidated entity has management control of QBE Insurance (Thailand) Co Limited and QBE Ukraine.
- The issued share capital of Hyfield Company Limited and Sinkaonamahasarn Company Limited owned by the consolidated entity is held by various controlled entities. Other controlled entities have the right to acquire the remaining share capital.

(3) Deep South Surplus of Texas LP, Mantis Reef Limited, Mantis Reef II Limited, Mantis Reef Pledge Limited, Mantis Reef II Pledge Limited, NP Capital Trust 1, QBE Employee Share Trust, QBE Irish Share Incentive Plan, QBE UK Share Incentive Plan, Star Trust, the QBE Funding Trusts, QBE Capital Funding LP and QBE Capital Funding LP II have been included in the consolidated financial statements as these entities are special purpose entities that exist for the benefit of the consolidated entity.

(4) The shareholding in QBE Makedonija equates to 73.50% (2007 73.50%) of the voting rights.

(E) Equity

All equity in controlled entities is held in the form of shares or through contractual arrangements.

(F) Acquisitions

The following entities were acquired during the financial year:

- On 1 January 2008, a wholly-owned entity acquired the Deep South group of companies ("Deep South"), an underwriting agency in the US. The purchase price was \$214 million including the maximum potential cost of contingent incentive arrangements for the next three years. Net tangible assets of \$4 million were acquired.
- On 30 April 2008, a wholly-owned entity acquired North Pointe Holdings Corporation ("North Pointe"), a NASDAQ listed property and casualty insurer in the US. The purchase price was \$152 million for net tangible assets of \$43 million.
- On 1 July 2008, a wholly-owned entity acquired SIU LLC, an underwriting agency in the US. The purchase price was \$21 million for net tangible liabilities of \$2 million.
- On 1 July 2008, a wholly-owned entity acquired 90% of Sanderson Insurance Brokers Pty Limited. The purchase price was \$93 million for net tangible assets of \$37 million.
- On 23 October 2008, a wholly-owned entity acquired PMI Mortgage Insurance Limited ("PMI"), a mortgage insurer for lenders writing business in Australia and New Zealand. The purchase price was \$1,121 million. Estimated net tangible assets of \$578 million were acquired.
- On 1 November 2008, a wholly-owned entity acquired Community Association Underwriters of America Inc, an underwriting agency in the US. The purchase price was \$236 million including the estimated cost of contingent consideration payable over four years. Estimated net tangible assets of \$15 million were acquired.
- On 1 December 2008, a wholly-owned entity acquired ZC Sterling Corporation ("ZCS"), a US-based underwriting agency. The purchase price was \$1,437 million including estimated contingent consideration payable over two years from the date of acquisition. Estimated net tangible liabilities of \$216 million were acquired.
- On 17 December 2008, a wholly-owned entity acquired PMI Mortgage Insurance Asia Limited, a mortgage insurer for lenders writing business in Hong Kong. The purchase price was \$73 million for net tangible assets of \$73 million.
- On 31 December 2008, a wholly-owned entity acquired Burnett Holdings Inc, a US-based underwriting agency. The purchase price was \$26 million including estimated contingent consideration. Net tangible assets of \$7 million were acquired.

Net assets acquired	29	617	60	54	168	928	1,595

(1) Includes a fair value adjustment of \$279 million to gross outstanding claims and a related deferred tax adjustment of \$84 million.

(2) Includes a fair value adjustment of \$47 million to gross outstanding claims and a related deferred tax adjustment of \$16 million.

Due to the timing of, and the complexities involved in, the acquisitions of ZCS and PMI, and the determination of the fair value of assets acquired is provisional only at this time.

(G) Goodwill acquired

	ZCS \$M	PMI \$M	NORTH POINTE \$M	DEEP SOUTH \$M	OTHER \$M	TOTAL 2008 \$M	TOTAL 2007 \$M
Purchase consideration							
Cash	878	1,100	151	160	368	2,657	2,445
Contingent consideration	490	–	–	54	80	624	–
Direct costs relating to the acquisition	–	21	1	–	1	23	4
Total purchase consideration	1,368	1,121	152	214	449	3,304	2,449
Fair value of net assets acquired	29	617	60	54	168	928	1,595
Minority interest in net assets acquired	–	(7)	–	–	(4)	(11)	–
Goodwill acquired	1,339	511	92	160	285	2,387	854

The above information is presented at the exchange rates prevailing at the date of the acquisitions.

The goodwill is attributable to the future profitability of the acquisitions and the synergies expected to arise within the consolidated entity.

The acquired businesses contributed premium revenue of \$183 million and net profit after income tax of \$66 million to the consolidated entity for the period from acquisition to 31 December 2008.

If the acquisitions had occurred on 1 January 2008, consolidated gross earned premium and consolidated net profit after income tax for the year ended 31 December 2008 would have been \$12,889 million and \$1,746 million respectively.

(H) Joint venture

On 19 July 2007, the consolidated entity entered into a joint venture agreement with Rajan Raheja Group to form Raheja QBE General Insurance Company. The consolidated entity has a 26% ownership interest in the joint venture. No business was written by this operation in 2007 or 2008.

(A) Identifiable intangibles

Lloyd's syndicate capacity, insurance licences and brand names are considered to have an indefinite useful life and no amortisation is charged. All remaining intangible assets are amortised over their finite useful lives and the amortisation charge is included in amortisation and impairment of goodwill/intangibles in the income statement. The most significant classes of intangible assets are as follows:

(i) Lloyd's syndicate capacity

The Lloyd's syndicate capacity relates to the syndicate capacity acquired as part of the acquisition of QBE Underwriting Limited (formerly trading as Limit) in 2000 and costs incurred as a result of increasing capacity since that date. The consolidated entity has demonstrated a long-term commitment to developing its operations at Lloyd's. Since acquiring QBE Underwriting Limited, the consolidated entity has increased its share of ownership for all syndicates from 55% in 2000 to 91% for the 2008 underwriting year. The value of this asset is in the access it gives to future underwriting profits at Lloyd's. For these reasons Lloyd's syndicate capacity is deemed to have an indefinite useful life.

(ii) Renewal rights/distribution channels

This is the capitalisation of future profits relating to insurance contracts acquired and the expected renewal of those contracts. It also includes the value of the distribution network. Renewal rights and distribution channels are amortised over lives of between five and 21 years depending on the classes of business to which the rights relate.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

19 INTANGIBLE ASSETS (CONSOLIDATED) CONTINUED

(iii) Brand names

This asset reflects the revenue generating ability of acquired brands. It is considered to have an indefinite useful life due to its long-term nature.

(iv) Insurance licences

This asset gives the consolidated entity the right to operate in certain geographic locations and to write certain classes of business with a potential to generate additional revenue. It is considered to have an indefinite useful life due to its long-term nature.

(v) Software

This is the fair value of key operating systems acquired in business combinations which will benefit the future operations of the acquired entity. Capitalised software is amortised over periods ranging from four to 15 years, reflecting the period during which the consolidated entity is expected to benefit from the use of the software.

(B) Goodwill

Goodwill is allocated to cash generating units being the lowest level at which there are separately identifiable cash flows relating to the goodwill. As the consolidated entity continues to acquire operations and reorganise the way that operations are managed, reporting structures may change giving rise to a reassessment of cash generating units.

The goodwill relating to certain acquisitions outside Australia is denominated in currencies other than the Australian dollar and so is subject to foreign exchange movements.

Goodwill is allocated to cash generating units as follows:

	2008 \$M	2007 \$M
Australian operations	747	695
QBE Insurance Europe	284	268
Lloyd's division	238	232
North American operations	2,821	793
QBE LMI	511	–
Other	47	68
	4,648	2,056

(C) Impairment testing of intangible assets

The consolidated entity's accounting policy in respect of impairment testing of intangible assets is included in note 1(W). The recoverable amount of each cash generating unit is determined by reference to a value in use calculation based on the following key assumptions and estimates:

- discounted cash flow projections for a five year period are included in the calculation. This information is extracted from the latest three year business plan which has been presented to and approved by the board;
- projections for years four and five are based on the final year of the three year business plan assuming growth of 2.5% per annum;
- discount rates are pre-tax and reflect a beta and equity risk premium appropriate to the consolidated entity; and
- terminal value is calculated using a perpetuity growth formula based on the cash flow forecast for year five and an appropriate discount rate and terminal growth rate.

The discount rates used to value cash generating units at 31 December 2008 were in a range of 10.1% to 13.2%.

Expected present value of future cash flows for future claims including risk margin	4,374	3,313

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

21 UNEARNED PREMIUM (CONSOLIDATED) CONTINUED

(D) Liability adequacy test

The probability of adequacy applied in the liability adequacy test differs from the probability of adequacy adopted in determining the outstanding claims provision. The reason for the difference is that the former is a benchmark used only to test the sufficiency of net premium liabilities whereas the latter is a measure of the adequacy of the outstanding claims provision actually carried by the consolidated entity.

AASB 1023 requires the inclusion of a risk margin in insurance liabilities, but does not prescribe a minimum level of margin. Whilst there is established practice in the calculation of the probability of adequacy of the outstanding claims provision, no such guidance exists in respect of the level of risk margin to be used in determining the adequacy of net premium liabilities. The consolidated entity has adopted a risk margin for the purpose of the liability adequacy test to produce a 75% probability of adequacy in respect of total insurance liabilities. The 75% basis is a recognised industry benchmark in Australia, being the minimum probability of adequacy required for Australian licensed insurers by APRA.

The application of the liability adequacy test in respect of the net premium liabilities identified a surplus at 31 December 2008 and 2007.

(E) Risk margin

The process used to determine the risk margin is explained in note 3(A)(iii).

The risk margin in expected future cash flows for future claims as a percentage of the central estimate is 4.9% (2007 5.1%). This is the risk margin required to give a probability of adequacy of 75% for total insurance liabilities.

22 OUTSTANDING CLAIMS (CONSOLIDATED)

(A) Net outstanding claims

	2008 \$M	2007 \$M
Gross outstanding claims	22,059	20,116
Claims settlement costs	531	477
	22,590	20,593
Discount to present value	(1,386)	(2,362)
Gross outstanding claims provision	21,204	18,231
Less than 12 months	7,240	5,908
Greater than 12 months	13,964	12,323

Net outstanding claims	16,161	13,871
Central estimate	14,962	12,280
Risk margin	1,199	1,591
Net outstanding claims	16,161	13,871

(1) Reinsurance and other recoveries on outstanding claims are shown net of a provision for impairment of \$64 million (2007 \$109 million).

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

22 OUTSTANDING CLAIMS (CONSOLIDATED) CONTINUED

(B) Risk margin

The process used to determine the risk margin is explained in note 3(A)(iii) and details of the risk-free discount rates adopted are set out in note 3(A)(vi).

The probability of adequacy at 31 December 2008 is 86.1% (2007 94.0%) which is well above APRA's 75% benchmark. The risk margin included in net outstanding claims is 8.0% (2007 13.0%) of the central estimate.

(C) Reconciliation of movement in discounted outstanding claims provision

	2008			2007

Five years later	3,483	2,757	2,477	–	–	–	–	–	
Six years later	3,453	2,774	–	–	–	–	–	–	
Seven years later	3,447	–	–	–	–	–	–	–	
Current estimate of net cumulative claims cost	3,447	2,774	2,477	3,493	4,227	4,116	8,641	8,232	
Cumulative net payments	(3,141)	(2,359)	(2,121)	(2,753)	(2,946)	(2,441)	(4,203)	(2,324)	
Net undiscounted outstanding claims for the eight most recent accident years	306	415	356	740	1,281	1,675	4,438	5,908	15,119

The consolidated entity writes business in currencies other than the Australian dollar in its overseas operations. The translation of outstanding claims denominated in foreign currencies gives rise to foreign exchange movements which have no direct bearing on the development of the underlying claims. To eliminate this distortion, claims liabilities have been translated to the functional currencies of our overseas operations at constant rates of exchange. All estimates of net ultimate claims cost and cumulative claims payments for the eight most recent accident years reported in functional currencies other than Australian dollars have been translated to Australian dollars using the closing rate of exchange at 31 December 2008.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

22 OUTSTANDING CLAIMS (CONSOLIDATED) CONTINUED

- (ii) Reconciliation of net undiscounted outstanding claims for the eight most recent accident years to net outstanding claims

	TOTAL \$M
Net undiscounted outstanding claims for the eight most recent accident years	15,119
Outstanding claims – accident years 2000 and prior	781
Foreign exchange	686
Discount on outstanding claims	(1,035)
Claims settlements costs	531
Other	79
Net outstanding claims at 31 December 2008	16,161

- (iii) Commentary

The claims development table is presented net of reinsurance. With operations in 45 countries, hundreds of products, various reinsurance arrangements and with the consolidated entity's risk tolerance managed on a consolidated net basis, it is not considered meaningful or practicable to provide this information other than on a consolidated net accident year basis.

Outstanding claims in respect of acquisitions are included in the estimate of net ultimate claims cost in the accident year in which the acquisition was made. The exception is increased participation in Lloyd's syndicates where the increased share of the outstanding claims provision is allocated to the original accident year. As a result, the outstanding claims provisions of QBE LMI and North Pointe, both of which were acquired in the current financial year, are included within 2008 accident year development.

(1) Hybrid securities are shown net of the equity conversion option. The US dollar principal amounts shown are the outstanding amounts payable at the end of the 20 year term.

(B) Finance costs

\$5 million (2007 \$15 million) of finance costs have been capitalised in the year.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

24 BORROWINGS CONTINUED

(C) Security and facility arrangements

In the normal course of business, bank loans are made to controlled entities and secured by guarantees or letters of comfort given by the company.

The Eurobonds were issued by a controlled entity and secured by guarantees given by the company and another controlled entity. The US\$250 million subordinated debt was issued by the company. The claims of bondholders pursuant to both of these borrowings will be subordinated in right of payment to the claims of all senior creditors, including policyholders, of the relevant controlled entity.

The hybrid securities are guaranteed by the company and a controlled entity. The claims of investors under these guarantees in general will rank equally with all existing and future unsecured and unsubordinated indebtedness of the company and the controlled entity.

The performance of the obligations of the controlled entity under the capital securities is guaranteed by the company to the extent that the controlled entity has funds. The guarantee is an unsecured and subordinated obligation of the company. The guarantee ranks senior to the claims of the holders of ordinary shares of the company, equally with equally ranked securities and instruments of the company and junior to the claims of creditors of the company.

(D) Hybrid securities

(i) Hybrid securities due 2027

In 2007, a controlled entity issued £258 million of 20 year hybrid securities. Investors can request repurchase at the end of years three, five, seven, 10 or 15 from the date of issue. The company can redeem the securities at any time after three years from the date of issue. Investors have the option to convert the security if:

- the company calls for their redemption;
- the market value of the security is less than the market value of the underlying shares in the company for five consecutive trading days; or
- on certain corporate transactions occurring (e.g. change in control).

In the event of conversion, up to 11 million shares will be issued.

(ii) Hybrid securities due 2024

In 2004, a controlled entity issued US\$375 million of 20 year hybrid securities. Investors can request repurchase at the end of years one, three, five, seven, 10 or 15 from the date of issue. The company can redeem the securities at any time after three years from the date of issue. Investors have the option to convert the security if:

- the company calls for their redemption;
- the market value of the security is less than the market value of the underlying shares in the company for five consecutive trading days; or
- on certain corporate transactions occurring (e.g. change in control).

In 2008, no shares were issued as a result of the conversion of the hybrid securities due 2024. In 2007, 22 million shares were issued as a result of the conversion of 70% of the hybrid securities. In the event of conversion of the remaining securities, approximately nine million shares will be issued.

(E) Capital securities

In 2007, a controlled entity issued US\$550 million of capital securities. In 2006, a controlled entity issued £300 million of capital securities. The securities have no fixed redemption date and may not be called for redemption or conversion by the investors.

Both issues of capital securities are subordinated. Distributions are deferrable and not cumulative. If a distribution or principal amount is not paid by the controlled entity, and the company does not pay the amount under the guarantee, then the capital securities are to be redeemed for QBE preference shares. For so long as the distributions or principal amounts are outstanding, no payments (including distributions or principal amounts) are to be made on the company's shares or other instruments ranking junior to the securities. Payment of distributions or principal amounts on equal ranking securities may be paid proportionally.

In 2008, US\$301 million and £282 million of capital securities were repurchased by the consolidated entity at a discount giving rise to a profit of \$303 million on consolidation. These securities continue to be held by the consolidated entity. The capital securities were repurchased using the senior notes due 2014.

(F) Senior notes due 2014

In 2008, the company issued US\$211 million and £191 million of senior notes maturing on 14 March 2014. The notes are unsecured and unsubordinated obligations of the consolidated entity and will rank equally amongst themselves and, subject to certain exceptions in relation to ranking, with all other unsecured existing and future senior indebtedness of the consolidated entity. Interest of 9.75% per annum is payable half-yearly on the US dollar notes and interest of 10.00% per annum is payable half-yearly on the sterling notes.

Notes to the financial statements

Ordinary shares in the company have no par value and entitle the holder to participate in dividends and the proceeds on winding up of the company in proportion to the number of shares held. Ordinary shareholders rank after all creditors and are entitled to any residual proceeds.

(B) Share capital, fully paid yet to be issued

5,592,597 ordinary shares in the company were paid for at the balance sheet date (\$115 million). These shares were issued on 20 January 2009.

(C) Treasury shares held in trust (consolidated)

At 1 January	16	16
Acquisitions of shares	10	37
Shares vested and/or released to participants	(25)	(37)
At 31 December	1	16

Shares in the company may be bought on-market to satisfy future obligations of the company under the various employee share based remuneration plans. Any such shares are held in trust. On consolidation, these shares are recognised as treasury shares held in trust. The balance of the treasury shares held in trust at the balance sheet date represents the cumulative cost of acquiring shares in the company that have not yet been distributed to employees as share based remuneration.

(D) Equity component of hybrid securities

(E) Dividend Reinvestment and Bonus Share Plans

The company operates a Dividend Reinvestment Plan ("DRP") and a Bonus Share Plan ("BSP"). The BSP was previously known as the Dividend Election Plan.

The last date of receipt of election notices applicable to the BSP was 26 February 2009. The last date of receipt of election notices applicable to the DRP will be 11 March 2009.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

25 CONTRIBUTED EQUITY CONTINUED

(F) Dividend (company and consolidated)

	2008 \$M	2007 \$M
Previous year final dividend paid on ordinary shares		
Franked at 50% – 32.5 cents (2007 33.0 cents, 60% franked)	288	271
Unfranked – 32.5 cents (2007 22.0 cents)	288	181
	576	452
Interim dividend paid on ordinary shares		
Franked at 20% – 12.2 cents (2007 34.2 cents, 60% franked)	108	295
Unfranked – 48.8 cents (2007 22.8 cents)	434	197
	542	492
Dividend reinvestment under Bonus Share Plan	(55)	(63)
Total dividend paid	1,063	881

The interim dividend of \$542 million was paid on 17 September 2008. On 27 February 2009, the directors declared a 20% franked final dividend of 65.0 cents per share (2007 65.0 cents per share, 50% franked). The final dividend payout is \$645 million (2007 \$576 million).

The franking account balance on a tax paid basis as at the balance sheet date was a surplus of \$223 million (2007 \$100 million).

Following the introduction of the conduit foreign income ("CFI") rules effective for the consolidated entity from 1 January 2006, shareholders not resident in Australia will receive CFI unfranked dividends for the unfranked portion of the final 2008 dividend exempt from Australian tax and not subject to Australian withholding tax.

(G) Options issued to third parties

No third party held options over shares in the company at any time during the current year.

Details of the movements in respect of such options during the prior year were as follows:

2007					
GRANT DATE	EXERCISE PRICE	BALANCE AT 1 JAN 2007	EXERCISED ⁽¹⁾ IN THE YEAR	BALANCE AT 31 DEC 2007	EXPIRY DATE
1 December 2004	\$0.00	1,500,000	1,500,000	–	30 November 2007

(1) The exercise of 1,500,000 options resulted in the issue of 752,000 shares.

(H) Capital risk management

The consolidated entity manages its capital requirements by assessing capital levels on a regular basis. Its objectives are to maintain an optimal capital structure to reduce the cost of capital whilst providing security for policyholders and continuing to provide returns to shareholders. Where appropriate, adjustments are made to capital levels in light of changes in economic conditions and risk characteristics of the consolidated entity's activities. In order to maintain or adjust the capital structure, the consolidated entity has the option to adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The wholly-owned entities which are insurance companies are subject to, and are in compliance with, externally imposed capital requirements set and monitored by regulatory bodies. These requirements are in place to ensure sufficient solvency margins for the protection of policyholders. In addition, the consolidated entity aims to maintain a strong credit rating and robust capital ratios in order to support its business objectives and maximise shareholder wealth.

The capital requirements of each business unit are assessed using capital modelling techniques with capital allocated to business units to reflect, amongst other factors, past results and the inherent volatility of the business written in that business unit.

27 SHARE BASED PAYMENTS

(A) Employee Share and Option Plan

The company, at its 1981 AGM, approved the issue of shares from time to time under an Employee Share and Option Plan ("the Plan"), up to 5% of the issued ordinary shares in the capital of the company. Any full-time or part-time employee of the consolidated entity or equally owned joint venture who is offered shares or options pursuant to the offer document of the Plan is eligible to participate in the Plan.

Under the Plan, ordinary shares of the company are offered at the weighted average market price during the five trading days up to the date of the offer. Likewise, the exercise price for options offered under the Plan is the weighted average market price during the five trading days up to the date of the offer.

In accordance with the terms of the Plan, interest-free loans are granted to employees to subscribe for shares issued under the Plan. Prior to 20 June 2005, the terms of the loans were either personal recourse or non-recourse. With effect from 20 June 2005, only personal recourse loans are granted to employees to subscribe for shares under the Plan. The loans are repayable in certain circumstances as set out in the Plan such as termination of employment or breach of condition.

Currently there are three schemes operating within the Plan:

(i) Deferred Compensation Plan

Senior management are invited to participate in the Deferred Compensation Plan ("DCP"). Under the DCP, the directors can issue conditional rights to shares and grant options to senior management who have already achieved predetermined performance criteria. The terms of the DCP may vary to take into account the requirements and market conditions of the locations of senior management, but the general terms of the DCP conditional rights and options are set out below.

- The conditional rights entitle relevant employees to receive shares on the third anniversary of the grant of the rights. Further shares are issued in relation to the conditional rights to reflect dividends paid on ordinary shares of the company in the period commencing from the date of the grant of the conditional rights. The shares issued pursuant to the conditional rights are issued without payment being made by senior management (i.e. at a nil exercise price).
- The options are subject to the terms and conditions of the Plan. Options issued in 2004 and prior can be exercised after three years, whilst any options issued in 2005 and thereafter will generally be exercisable after five years. They must be exercised within a 12 month period after vesting. Interest-free personal recourse loans are granted on the terms permitted by the Plan as described above to persons who hold options to fund the exercise of options. As a result of approved changes to the DCP, options and loans will not be issued with effect from 1 January 2010.

The shares issued pursuant to the conditional rights and options will only be issued if the individual has remained in the company's service throughout the vesting period (unless leaving due to redundancy, retirement through ill health or age, or death) and is not subject to disciplinary proceedings or notice on that date.

Shareholder approval of the DCP was given at the 2006 AGM for the purpose of ASX Listing Rule 7.2, sections 200B and 200E of the *Corporations Act 2001* and for all other purposes.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

27 SHARE BASED PAYMENTS CONTINUED

(ii) Share Incentive Plan

Generally, all full-time or part-time employees of the consolidated entity with a minimum of one year's service are invited to participate in the Share Incentive Plan ("the SIP"). Under the SIP, the directors can provide shares up to \$1,000 to employees without payment being made by employees. The allocation of shares is based on the period of service. The shares are purchased on-market and held in trust for the employee for a minimum of three years or until cessation of employment, whichever is earlier. Further details are provided in note 27(E).

(iii) Group Executive Restricted Share Plan

Group head office management and the Group operations executive are eligible to participate in the Group Executive Restricted Share Plan ("GERSP") which came into effect from 1 January 2008. Under the GERSP, eligible executives have the opportunity to acquire additional equity in the form of restricted shares if the consolidated entity exceeds a target return on equity and the division for which the relevant executive is responsible also exceeds a specified return on equity target. For head office executives, entitlement will only be based on the consolidated entity's return on equity target.

The restricted shares entitle relevant executives to receive fully paid QBE shares on the third anniversary of the grant of the restricted shares. Further shares are issued in relation to the restricted shares to reflect dividends paid on ordinary shares of the company in the period commencing from the date of the grant of the restricted shares. The shares issued pursuant to the restricted shares are issued without payment being made by the executive (i.e. at a nil exercise price).

The shares issued pursuant to the restricted shares will only be issued if the individual has remained in the company's service throughout the vesting period (unless leaving due to redundancy, retirement through ill health or age, or death) and is not subject to disciplinary proceedings or notice on that date.

(B) Employee options

During the year, the company granted to 866 (2007 776) qualifying employees options over ordinary shares with a total market value of \$54 million (2007 \$62 million), being the quoted market price at the date the options were granted. The weighted average fair value of options granted during the year ended 31 December 2008 was \$4.61 (2007 \$6.38).

The market value of the options outstanding at the balance sheet date was \$238 million (2007 \$240 million), calculated by reference to the quoted market value of the underlying shares at that date.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

27 SHARE BASED PAYMENTS CONTINUED

Details of the number of employee options granted, exercised and forfeited or cancelled during the year, including those issued under the DCP, were as follows:

2008 GRANT DATE	EXERCISE PRICE	BALANCE AT 1 JAN 2008	GRANTED IN THE YEAR	EXERCISED IN THE YEAR	CANCELLED/ FORFEITED IN THE YEAR	BALANCE AT 31 DEC 2008

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

27 SHARE BASED PAYMENTS CONTINUED

(D) Fair value of options and conditional rights

The fair value of both options and conditional rights is determined using a binomial model. The fair value is earned evenly over the period between grant and vesting. For those options and conditional rights granted during the year to 31 December 2008, the following significant assumptions were used:

		OPTIONS		CONDITIONAL RIGHTS	
		2008	2007	2008	2007
Share price on grant date	\$	20.50 – 25.19	31.33 – 32.62	20.50 – 25.19	31.33 – 32.62
Fair value of instrument at grant date	\$	3.36 – 5.16	5.05 – 12.55	24.22 – 27.00	32.68
Risk-free interest rate	%	6.2 – 6.5	5.8 – 5.9	6.2 – 6.5	5.8 – 5.9
Expected share price volatility	%	25.0	20.0	25.0	20.0
Expected dividend yield	%	5.0	3.5	5.0	3.5
Expected life of instrument	years	3.0 – 5.0	3.0 – 5.0	3.0	3.0

Some of the assumptions are based on historical data which is not necessarily indicative of future trends. Reasonable changes in these assumptions would not have a material impact on the amounts recognised in the financial statements.

(E) Share Incentive Plan

The SIP was introduced during 2005 and is a global reward scheme available to eligible permanent employees who have met minimum service conditions at the annual grant date. Under the terms of the SIP, eligible employees may be offered up to \$1,000 of fully paid ordinary shares in the company annually for no cash consideration. The market value of shares issued under the terms of the SIP is expensed in the period in which the shares are granted. The total number of shares issued to participating employees in the year was 193,275 (2007 150,474). The weighted average market price on the issue date was \$23.76 (2007 \$32.00).

(F) Share based payment expenses

Total expenses arising from share based payment transactions during the year included in underwriting expenses were as follows:

	CONSOLIDATED	
	2008 \$M	2007 \$M
Options provided under the DCP	10	8
Conditional rights provided under the DCP	23	19
Shares provided under the SIP	5	5
	38	32

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

28 KEY MANAGEMENT PERSONNEL (COMPANY AND CONSOLIDATED)

Key management personnel are those persons defined as having authority and responsibility for planning, directing and controlling the activities of the consolidated entity, either directly or indirectly, including any director (executive or non-executive).

(A) Directors

The following directors held office during the financial year:

Non-executive directors

EJ Cloney (chairman)
 LF Bleasel AM
 DM Boyle
 IF Hudson
 BJ Hutchinson AM
 CLA Irby
 IYL Lee

Executive director

FM O'Halloran

(B) Other key management personnel

All of the persons in the table below were key management personnel for some period during the year ended 31 December 2008.

NAME	POSITION	EMPLOYER	EMPLOYMENT DATES
SP Burns	Chief executive officer, European operations	QBE Management Services (UK) Limited	1 January 1987
NG Drabsch	Chief financial officer, QBE Insurance Group Limited	QBE Management Services Pty Limited	20 September 1991
MJ Goodwin	Chief executive officer, Asia Pacific operations	QBE Management Services Pty Limited	19 February 1992
MD ten Hove	Group general manager, investments QBE Insurance Group Limited	QBE Management Services Pty Limited	1 March 1999
TW Ibbotson	Chief executive officer, Australian operations	QBE Management Services Pty Limited	12 July 1993
TM Kenny	President and chief executive officer, the Americas	QBE Reinsurance Corporation	28 November 1994 to 12 September 2008
V McLenaghan ⁽¹⁾	Chief operating officer, QBE Insurance Group Limited	QBE Management Services Pty Limited	14 August 1995

(1) Mr McLenaghan is also currently acting president and chief executive officer of QBE the Americas.

(C) Key management personnel – compensation

(v) Shareholdings

The movements during the year in the number of ordinary shares in the company held by the key management personnel, including their personally related parties, are provided in the table on page 134. Prior to 20 June 2005, non-recourse loans were provided by the consolidated entity to the executive director and other key management personnel on the exercise of their options for the purchase of shares in the company. Under AIFRS, non-recourse loans and the related shares are derecognised and are instead treated as options.

FM O'Halloran – retirement benefits

Mr O'Halloran joined QBE in June 1976. 11 of his years with the consolidated entity have been in the position of chief executive officer, with four years as director of operations, seven years as director of finance, five years as chief financial officer and the remainder as Group financial controller. On 1 January 1998, a controlled entity entered into a retirement benefit arrangement with Mr O'Halloran, which is in addition to his entitlement under the QBE Australia defined benefit plan. As Mr O'Halloran was employed by the consolidated entity in May 2004, on his retirement he will receive a lump sum payment of 150% of his total remuneration cost being his annual base salary plus STI for the year prior to the date of his retirement. As a condition of this arrangement, Mr O'Halloran has entered into a non-compete agreement for three years from the date of his retirement.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

29 DEFINED BENEFIT PLANS

	2008 \$M	2007 \$M
Retirement benefit surplus	2	3
Retirement benefit deficit	(134)	(29)
Post-employment health care benefit deficit	(14)	(24)
Defined benefit deficit	(148)	(53)

Entities in the consolidated entity participate in a number of superannuation plans which have been established and are sponsored by those entities. A number of these plans provide defined benefits to employees on retirement, disability or death. The benefits are based on years of service and an average salary calculation.

Contributions are made to the plans by both employees and controlled entities, typically as a percentage of salary and within the rules of the plans, and are based on funding schedules prepared by independent actuaries. The contribution rate in respect of defined benefit plans is agreed between the relevant controlled entity and the plans' trustees and actuaries. The consolidated entity has no immediate legal obligation to settle the liability.

The consolidated entity also sponsors defined benefit health care plans that provide post-employment medical benefits and life assurance to eligible retired employees. Contributions are made to cover the current cash outflows from the plans and a liability is recorded to recognise the estimated accrued but not yet funded obligations.

Independent actuarial assessments of all significant plans are completed at least once every three years. The main plans were assessed by various qualified employees of Russell Employee Benefits, AON Consulting, Watson Wyatt Worldwide, Prudential Financial and Mercers. All valuations have been updated for information available at 31 December 2008.

(A) Defined benefit surpluses (deficits)

The amounts recognised in the balance sheet for defined benefit plans are as follows:

	DATE OF LAST ACTUARIAL ASSESSMENT	FAIR VALUE OF PLAN ASSETS		PRESENT VALUE OF PLAN OBLIGATIONS		SURPLUS NOT RECOGNISED		NET RECOGNISED SURPLUS (DEFICIT)

Experience gains (losses) arising on plan liabilities	32	2	9	(6)	(42)
Experience (losses) gains arising on plan assets	(130)	(17)	(9)	39	7
	2008 \$M	2007 \$M	2006 \$M	2005 \$M	2004 \$M
Present value of plan obligations	(923)	(922)	(725)	(726)	(698)
Fair value of plan assets	829	910	727	560	498
Net (deficit) surplus	(94)	(12)	2	(166)	(200)

(G) Funding

Employer contributions to the defined benefit retirement plans are based on recommendations by the plans' actuaries. The objective of the consolidated entity's funding schedules is to ensure that benefit entitlements are fully funded at the time they become payable. Total employer contributions expected to be paid to the various plans in 2009 amount to \$25 million.

(1) From 1 January 2003, the consolidated entity may engage PricewaterhouseCoopers for non-audit services, subject to the general principle that fees for non-audit services should not exceed 30% of the total of all fees in any one year. Consistent with prior periods, PricewaterhouseCoopers cannot provide the excluded services of preparing accounting records or financial reports, asset or liability valuations, acting in a management capacity, acting as a custodian of assets or acting as share registrar.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

31 CONTINGENT LIABILITIES

The company and the consolidated entity had the following contingent liabilities:

	THE COMPANY		CONSOLIDATED	
	2008 \$M	2007 \$M	2008 \$M	2007 \$M
Guarantees of interest-bearing liabilities in controlled entities	620	548	–	–
Letters of credit issued in support of the consolidated entity's participation in Lloyd's of London	948	283	948	283
Letters of credit issued in support of insurance provisions of controlled entities	848	204	–	–
Guarantees to investors in hybrid securities	772	710	–	–
Guarantees to investors in ABC securities for funds at Lloyd's (due 2008)	–	627	–	–
Guarantees to investors in ABC securities for funds at Lloyd's (due 2009)	313	251	–	–
Guarantees to investors in capital securities	391	1,306	–	–

A controlled entity has entered into a number of deeds of covenant in respect of its controlled entities to meet part of their obligations to Lloyd's of London. The total guarantee given under these deeds of covenant amounts to \$126 million (2007 \$93 million). The obligations under the deeds of covenant are secured by a fixed and floating charge over certain investments and other assets in favour of Lloyd's of London. Refer note 11(C).

Controlled entities have entered into acquisition agreements. The costs of certain of these acquisitions have a contingent consideration component. The consolidated entity has made provision for the amount of contingent consideration that it expects to settle based on the achievement of specified performance criteria in future years. Details are provided in notes 18(G) and 23. Further amounts totalling \$584 million may be payable in the future subject to the achievement of performance criteria but are not considered probable at the balance sheet date.

Details of the guarantees to investors in Eurobonds, hybrid securities and capital securities and security arrangements in respect of borrowings are provided in note 24.

Details of contingent liabilities in respect of ABC securities for funds at Lloyd's are included in note 34.

			-	-	312	867
Swap (liability) asset relating to ABC securities			(1)	(3)	67	(30)

(A) ABC securities (due 2009)

In October 2004, the company entered into an arrangement with Mantis Reef II Limited ("MR(II)L") to issue US\$220 million of ABC (Asset Backed Capital) securities to support funds at Lloyd's ("FAL") pursuant to Lloyd's collateral requirements. This arrangement substantially replaced bank letters of credit and assisted in meeting new FAL requirements. MR(II)L is a special purpose entity incorporated with limited liability under the laws of the Cayman Islands. The consolidated entity has no ownership interest in MR(II)L. As it exists for the benefit of the consolidated entity it is included in the consolidated results.

Proceeds from the sale of the ABC securities to investors have been swapped to sterling and then used to purchase shares in a wholly-owned controlled entity of MR(II)L, Mantis Reef II Pledge Limited ("MR(II)PL"). MR(II)PL is another special purpose entity incorporated with limited liability under the laws of the Cayman Islands. The proceeds from the sale of shares in MR(II)PL have been used to purchase eligible investments over which security interests, in the form of a fixed and floating charge, have been granted to Lloyd's in support of FAL requirements of some of the company's controlled entities. Details of the eligible investments included in the asset portfolio are shown in the table above as ABC financial assets pledged for funds at Lloyd's.

Under its arrangement with MR(II)L and MR(II)PL, the company makes fixed payments to MR(II)L and in return receives the benefit of the earnings from the investment portfolio. As part of its agreement with MR(II)L and MR(II)PL the company can, if the need arises, call on MR(II)PL to provide up to £120 million by the sale or transfer of its investment portfolio to meet certain controlled entities' cash call requirements from Lloyd's, and at that time the company would assume a loan obligation including servicing of interest payments and repayment of the principal. To achieve this, the company would issue debt securities to MR(II)L with similar terms to the ABC securities.

The consolidated entity is exposed to cash flow interest rate and currency risk in respect of the ABC securities. In order to manage this risk and to service its fixed interest rate obligations, it has entered into a cross currency interest rate swap agreement under which it is obliged to pay variable rate interest on a sterling asset portfolio and receive a fixed amount of US dollar interest.

ABC securities (due 2009) are measured at amortised cost in original currency and translated to Australian dollars at the closing rate of exchange. Under the swap agreement, the consolidated entity pays a margin of 1.7% above the wholesale interbank rate monthly on £120 million and receives a fixed rate of 3.2% on US\$220 million every six months to match the interest payment to investors. The swap agreement currently comprises three swaps which are measured at fair value. Two of the swaps are designated as cash flow hedges and have satisfied the effectiveness tests throughout the period from inception and at the balance sheet date. The movement in the fair value of the cash flow hedges is taken to equity. Any ineffectiveness in the cash flow hedges is recognised directly in the income statement. An amount is transferred from equity and taken to the income statement to offset:

- the differential between the fixed and variable interest payments; and
- the foreign exchange gain or loss on translation of the financial liabilities.

During the year, a gain of \$96 million (2007 \$7 million) was recognised in equity relating to the fair value movements on the cash flow hedges. During the year, a gain of \$90 million (2007 \$3 million) was transferred from equity to the income statement.

Notes to the financial statements

FOR THE YEAR ENDED 31 DECEMBER 2008

34 ABC SECURITIES CONTINUED

(B) ABC securities (due 2008)

In October 2003, the company entered into an arrangement with Mantis Reef Limited ("MRL") to issue US\$550 million of ABC securities to support FAL pursuant to Lloyd's collateral requirements. This arrangement substantially replaced bank letters of credit. MRL is a special purpose entity incorporated with limited liability under the laws of the Cayman Islands. The ABC securities were redeemed on 14 November 2008 in accordance with the terms of the ABC custody arrangement. The related swaps matured on the same date.

The swap agreement comprised two swaps which were measured at fair value. The swaps were designated as fair value hedges and satisfied the relevant hedge effectiveness tests throughout the period. The fair value movement on the swaps was recognised in the income statement. Any change in the value of the financial liabilities as a result of the hedged risk adjusted the carrying amount of the hedged item and impacted the income statement.

During the year, a gain of \$4 million (2007 \$15 million) was recognised in the income statement relating to the fair value movements on the fair value hedges. During the year, a loss of \$6 million (2007 \$12 million) was recognised in the income statement as a change in the value of the related financial liability.

(C) Fair value of ABC securities

		2008 \$M	2007 \$M
Due 2008	US\$550 million	–	627
Due 2009	US\$220 million	310	250
		310	877

(D) Risk exposure

The credit risk arising from swaps relating to ABC securities is \$67 million (2007 \$nil).

The maturity profile and the effective weighted average interest rate of ABC financial assets pledged for funds at Lloyd's and ABC securities for funds at Lloyd's are provided below.

As at 31 December 2008

		FIXED INTEREST RATE MATURING IN 1 YEAR OR LESS
ABC financial assets pledged for funds at Lloyd's	\$M	250
Weighted average interest rate	%	2.2
ABC securities for funds at Lloyd's	\$M	312
Weighted average interest rate	%	4.8

As at 31 December 2007

		FIXED INTEREST RATE MATURING IN		TOTAL
		1 YEAR OR LESS	1 TO 2 YEARS	
ABC financial assets pledged for funds at Lloyd's	\$M	900	–	900
Weighted average interest rate	%	3.2	–	3.2
ABC securities for funds at Lloyd's	\$M	(618)	(249)	(867)
Weighted average interest rate	%	4.8	4.8	4.8

For an analysis of the sensitivity of the consolidated entity's financial instruments to market risks refer to note 5(A).

The swaps relating to ABC securities have been structured to mature on the same dates as the underlying securities.

Weighted average number of treasury shares held in trust	-	(1)
Weighted average number of ordinary shares used as the denominator in calculating basic earnings per share ⁽¹⁾	890	853
Weighted average number of dilutive potential ordinary shares relating to:		
Shares issued under the Plan	5	5
Options issued under the Plan	2	3
Hybrid securities ⁽²⁾	9	28
Unvested conditional rights supported by treasury shares held in trust	-	1
Weighted average number of ordinary shares used as the denominator in calculating diluted earnings per share	906	890

(1) Weighted average number of ordinary shares reflects shares adjusted to derecognise shares issued under the Plan. Basic earnings per share calculated with reference to issued share capital notified to the ASX would have been 207.7 cents (2007 224.1 cents). Refer to note 25(A).

(2) If all hybrid securities had been included in the calculation of diluted earnings per share at 31 December 2008, diluted earnings per share would have been 205.9 cents (2007 217.3 cents).

37 SEGMENT INFORMATION

(A) Business segments

The consolidated entity is an international general insurance and reinsurance group underwriting most major commercial and personal lines classes of business through operations in 45 countries. The business is managed on a divisional basis as follows:

Directors' declaration

In the directors' opinion:

- (a) the financial statements and notes set out on pages 70 to 147 are in accordance with the *Corporations Act 2001*, including:
 - (i) complying with accounting standards, the Corporations Regulations 2001 and other mandatory professional reporting requirements; and
 - (ii) giving a true and fair view of the company's and consolidated entity's financial position as at 31 December 2008 and of their performance, as represented by the results of their operations, changes in equity and their cash flows, for the financial year ended on that date; and
- (b) there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable.

The directors have been given the declarations by the chief executive officer and chief financial officer required by section 295A of the *Corporations Act 2001* for the financial year ended 31 December 2008.

Signed in SYDNEY this 27th day of February 2009 in accordance with a resolution of the directors.

EJ Cloney
Director

FM O'Halloran
Director

Independent auditor's report

TO THE MEMBERS OF QBE INSURANCE GROUP LIMITED

Report on the financial report

We have audited the accompanying financial report of QBE Insurance Group Limited ("the company"), which comprises the balance sheet as at 31 December 2008, the income statement, the statement of recognised income and expense and the cash flow statement for the year ended on that date, a summary of significant accounting policies, other explanatory notes and the directors' declaration for both QBE Insurance Group Limited and the QBE Insurance Group ("the consolidated entity"). The consolidated entity comprises the company and the entities it controlled at the year end or from time to time during the financial year.

Directors' responsibility for the financial report

The directors of the company are responsible for the preparation and fair presentation of the financial report in accordance with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Act 2001*. This responsibility includes establishing and maintaining internal control relevant to the preparation and fair presentation of the financial report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances. In note 1, the directors also state, in accordance with Accounting Standard AASB 101 *Presentation of Financial Statements*, that compliance with the Australian equivalents to International Financial Reporting Standards ensures that the financial report, comprising the financial statements and notes, complies with International Financial Reporting Standards.

Auditor's responsibility

Our responsibility is to express an opinion on the financial report based on our audit. We conducted our audit in accordance with Australian Auditing Standards. These Auditing Standards require that we comply with relevant ethical requirements relating to audit engagements and plan and perform the audit to obtain reasonable assurance whether the financial report is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial report. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial report, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial report and the remuneration disclosures contained in the directors' report in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial report.

Our procedures include reading the other information in the Annual Report to determine whether it contains any material inconsistencies with the financial report.

For further explanation of an audit, visit our website <http://www.pwc.com/au/financialstatementaudit>.

Our audit did not involve an analysis of the prudence of business decisions made by directors or management.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Independence

In conducting our audit, we have complied with the independence requirements of the *Corporations Act 2001*.

Auditor's opinion on the financial report

In our opinion:

- (a) the financial report of QBE Insurance Group Limited is in accordance with the *Corporations Act 2001*, including:
 - (i) giving a true and fair view of the company's and consolidated entity's financial position as at 31 December 2008 and of their performance for the year ended on that date; and
 - (ii) complying with Australian Accounting Standards (including the Australian Accounting Interpretations) and the Corporations Regulations 2001; and
- (b) the financial report also complies with International Financial Reporting Standards as disclosed in note 1.

Report on the remuneration report

We have audited the remuneration report included in pages 54 to 66 of the directors' report for the year ended 31 December 2008. The directors of the company are responsible for the preparation and presentation of the remuneration report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the remuneration report, based on our audit conducted in accordance with Australian Auditing Standards.

Auditor's opinion

In our opinion, the remuneration report of QBE Insurance Group for the year ended 31 December 2008 complies with section 300A of the *Corporations Act 2001*.

Matters relating to the electronic presentation of the audited financial report

This auditor's report relates to the financial report and remuneration report of QBE Insurance Group Limited for the year ended 31 December 2008 included on the QBE Insurance Group Limited's web site. The company's directors are responsible for the integrity of the QBE Insurance Group Limited web site. We have not been engaged to report on the integrity of this web site. The auditor's report refers only to the financial report and remuneration report named above. It does not provide an opinion on any other information which may have been hyperlinked to/from these statements or the remuneration report. If users of this report are concerned with the inherent risks arising from electronic data communications they are advised to refer to the hard copy of the audited financial report and remuneration report to confirm the information included in the audited financial report and remuneration report presented on this web site.

Shareholder information

QBE is incorporated in Australia, is listed on the Australian Securities Exchange ("ASX") and trades under the code "QBE".

Annual General Meeting ("AGM")

11:00am Wednesday, 8 April 2009

The Westin Hotel, 1 Martin Place, Sydney NSW Australia

Online proxy voting is available through the Link investor service centre website.

Voting rights of ordinary shares

The constitution provides for votes to be cast:

- on a show of hands, one vote for each shareholder; and
- on a poll, one vote for each fully paid ordinary share.

Shareholder information and enquiries

Most enquiries and correspondence regarding shareholdings can be directed to QBE's share registrar:

Link Market Services Limited ("Link")

Locked Bag A14, Sydney South NSW 1235 Australia

Level 12, 680 George Street, Sydney NSW 2000 Australia

Telephone: +61 2 8280 7158

Facsimile: +61 2 9287 0303

Internet: www.linkmarketservices.com.au (Link investor service centre website)

Email: registrars@linkmarketservices.com.au

For security purposes, please quote your Securityholder Reference Number ("SRN") or Holder Identification Number ("HIN").

If you are broker (CHESS) sponsored, queries relating to incorrect registrations and changes to name and/or address can only be processed by your stockbroker. Link cannot assist you with these changes. Please quote your HIN.

Relevant interests register

Orient Capital Pty Limited of Level 12, 680 George Street, Sydney NSW 2000, Australia maintains QBE's register of information about relevant interests. The register contains any responses from custodians on and after 1 January 2005 to searches relating to the beneficial ownership of QBE's shares. Shareholders and other parties can telephone Orient Capital on +61 2 8280 6000 or facsimile on +61 2 8280 6001 if they wish to inspect this register.

Shareholding details online

View your shareholdings and update your details online at the Link investor service centre website. You will be asked to provide either your SRN or HIN, your surname and postcode.

You may receive dividend statements, notices of meetings, annual reports and major company announcements electronically by registering your email address at the Link investor service centre website.

Annual report mailing list

Recent amendments to the Corporations Act have removed the obligation for companies to mail an annual report to shareholders. To improve efficiency, save costs and reduce our impact on the environment by minimising unnecessary use of paper and printing resources, the annual report is published on our website at www.qbe.com.

If you wish to receive a hard copy of the annual report, please notify Link in writing or select the annual report option under "communication options" on the Link investor service centre website.

The half yearly results summary to 30 June 2009 will be mailed with the interim dividend. The next annual report for the year ending 31 December 2009 will be distributed in March 2010. QBE does not produce a concise financial report.

Shareholder information

Tax File Number ("TFN"), Australian Business Number ("ABN") or exemption – Australian residents

You can confirm whether you have lodged your TFN, ABN or exemption by visiting the Link investor service centre website. If you choose not to lodge these details, QBE is obliged to deduct tax at the highest marginal rate (plus the Medicare levy) from the unfranked portion of dividends paid. Australian shareholders living abroad should advise Link of their resident status as limited exemptions to tax deductions may apply. TFN forms are available from Link or can be downloaded from either the QBE or Link websites.

Conduit foreign income ("CFI")

Shareholders will receive CFI credits in respect of the whole unfranked portion of QBE dividends. These credits exempt non-resident shareholders from Australian withholding tax.

Dividends

QBE encourages shareholders to have cash dividends credited directly to a bank, building society or credit union account in Australia or New Zealand to eliminate delays in funds clearance and to significantly reduce the risk of loss or theft. A dividend advice confirming the deposit details is either mailed to you or is available online on the payment date.

Eligible shareholders can participate in QBE's Dividend Reinvestment Plan ("DRP") and Bonus Share Plan ("BSP") when the plans are active. The DRP enables you to apply to subscribe for additional shares. The BSP is a bonus share plan whereby the dividend entitlement is forgone for bonus shares in lieu of the dividend. In order to participate in either the DRP or BSP, you must have a minimum shareholding of 100 shares.

Participants may change their election to participate in the DRP and BSP at any time. DRP/BSP election cut-off dates and application forms are available from QBE's website.

Unpresented cheques/unclaimed money

Under the Unclaimed Moneys Act, unclaimed dividends must be given to the NSW state treasury. It is very important that shareholders bank outstanding dividend cheques promptly and advise Link immediately of changes of address or bank account details.

Privacy legislation

Chapter 2C of the *Corporations Act 2001* requires information about you as a security holder (including your name, address and details of the securities you hold) to be included in QBE's share register. These details must continue to be included in the public register even if you cease to be a security holder. A copy of the privacy policy is available on Link's website.

Glossary of insurance terms

Attritional claims ratio	Total net claims with a cost of less than \$2.5 million as a percentage of net earned premium.
Broker	One who negotiates contracts of insurance or reinsurance on behalf of an insured party, receiving a commission from the insurer or reinsurer for placement and other services rendered.
Casualty insurance	Insurance that is primarily concerned with the losses caused by injuries to third persons or their property (i.e. not the policyholder) and the resulting legal liability imposed on the insured. It includes, but is not limited to, general liability, employers' liability, workers' compensation, professional liability, public liability and motor liability insurance.
Catastrophe reinsurance	A form of excess of loss reinsurance that, subject to specified limits, indemnifies the insured for the amount of loss in excess of a specified retention with respect to an accumulation of claims resulting from a catastrophe event or series of events.
Claim	The amount payable under a contract of insurance or reinsurance arising from a loss relating to an insured event.
Claims incurred	The aggregate of all claims paid during an accounting period adjusted by the change in the claims provision for that accounting period.
Claims provision	The estimate of the most likely cost of settling present and future claims and associated claims adjustment expenses plus a risk margin for the possible fluctuation of the liability.
Combined operating ratio	The sum of the claims ratio, commission ratio and expense ratio. A combined operating ratio below 100% indicates profitable underwriting results. A combined operating ratio over 100% indicates unprofitable underwriting results.
Commission ratio	Net commission expense as a percentage of net earned premium.
Excess of loss reinsurance	A form of reinsurance in which, in return for a premium, the reinsurer accepts liability for claims settled by the original insurer in excess of an agreed amount, generally subject to an upper limit.
Expense ratio	Underwriting and administrative expenses as a percentage of net earned premium.
Facultative reinsurance	The reinsurance of individual risks through a transaction between the reinsurer and the cedant (usually the primary insurer) involving a specified risk.
General insurance	Generally used to describe non-life insurance business including property and casualty insurance.
Gross claims incurred	The amount of claims incurred during an accounting period before deducting reinsurance recoveries.
Gross earned premium	The total premium on insurance earned by an insurer or reinsurer during a specified period on premiums underwritten in the current and previous underwriting years.
Gross written premium	The total premium on insurance underwritten by an insurer or reinsurer during a specified period, before deduction of reinsurance premium.
Incurred but not reported (IBNR)	Claims arising out of events that have occurred before the end of an accounting period but have not been reported to the insurer by that date.
Insurance profit	The sum of the underwriting profit (loss) and investment income on policyholders' funds.
Insurance solvency ratio	Ratio of net tangible assets to net earned premium. This is an important industry indicator in assessing the ability of general insurers to settle their existing liabilities.
Inward reinsurance	The reinsurance or assumption of risks written by another insurer.
Large individual risk and catastrophe claims ratio	The aggregate of claims each with a cost of \$2.5 million or more as a percentage of net earned premium.
Long-tail	Classes of insurance business involving coverage for risks where notice of a claim may not be received for many years and claims may be outstanding for more than one year before they are finally settled and quantifiable by the insurer.
Net claims incurred	The amount of claims incurred during an accounting period after deducting reinsurance recoveries.
Net claims ratio	Net claims incurred as a percentage of net earned premium.
Net earned premium	Net written premium adjusted by the net change in unearned premium for a year.
Net investment income	Gross investment income net of finance costs, foreign exchange gains and losses and investment expenses.
Net written premium	The total premium on insurance underwritten by an insurer during a specified period after the deduction of premium applicable to reinsurance.
Outstanding claims provision	The amount of provision established for claims and related claims expenses that have occurred but have not been paid.
Policyholders' funds	Those financial assets held to fund the insurance provisions of the consolidated entity.
Premium	Amount payable by the insured or reinsured in order to obtain insurance or reinsurance protection.
Proportional reinsurance	A type of reinsurance in which the original insurer and the reinsurer share claims in the same proportion as they share premiums.
Recoveries	The amount of claims recovered from reinsurance, third parties or salvage.
Reinsurance	An agreement to indemnify a primary insurer by a reinsurer in consideration of a premium with respect to agreed risks insured by the primary insurer. The enterprise accepting the risk is the reinsurer and is said to accept inward reinsurance. The enterprise ceding the risks is the cedant or ceding company and is said to place outward reinsurance.
Reinsurer	The insurer that assumes all or part of the insurance or reinsurance liability written by another insurer. The term includes retrocessionaires, being insurers that assume reinsurance from a reinsurer.
Retention	That amount of liability for which an insurance company will remain responsible after it has completed its reinsurance arrangements.
Short-tail	Classes of insurance business involving coverage for risks where notice of a claim is received and claims are outstanding for one year or less before they are finally quantifiable and settled by the insurer.
Treaty reinsurance	Reinsurance of risks in which the reinsurer is obliged by agreement with the cedant to accept, within agreed limits, all risks to be underwritten by the cedant within specified classes of business in a given period of time.
Underwriting	The process of reviewing applications submitted for insurance or reinsurance coverage, deciding whether to provide all or part of the coverage requested and determining the applicable premium.
Underwriting expenses	The aggregate of policy acquisition costs, excluding commissions, and the portion of administrative, general and other expenses attributable to underwriting operations.
Underwriting profit (loss)	The amount of profit (loss) from insurance activities exclusive of net investment income and capital gains or losses.
Underwriting year	The year in which the contract of insurance commenced or was underwritten.
Unearned premium	The portion of a premium representing the unexpired portion of the contract term as of a certain date.
Written premium	Premiums written, whether or not earned, during a given period.

Henry Clay Frick was an avid collector with a discerning eye and a talent for negotiation, both in business and in the pursuit of art. Frick's business success provided an opportunity for the acquisition of a unique collection of artworks. By the early 1900s, Frick had used his wealth to accumulate hundreds of paintings spanning the pre-Renaissance to the post-Impressionist eras, with artworks by masters such as Turner, Monet, Degas, Whistler and many more. The Frick Collection testifies to how great art collections can still inspire people today. It features masterpieces of Western painting, sculpture and decorative art displayed in a serene and intimate setting in a New York City mansion built by Frick, which itself is a magnificent example of architecture and design.

Our thanks to the trustees and staff of the Frick Collection for enabling us to feature selected paintings from the collection.
